# NOVELTIES IN VEGETABLES

1902

## The Cumberland Cucumber.

### THE BEST PICKLING CUCUMBER KNOWN.

We offer our customers seed, to be grown during season of 1902, of what we honestly believe to be the best pickling cucumber ever produced.

This variety was originated by us, and the entire existing stock of seed is in our possession.

The variety is of the hardy, white spine type, is a rapid, strong and vigorous grower and very prolific in fruit.

The pickles differ from all other hardy sorts in being thickly set with fine spines over the entire surface, except the extreme stem end; and during the whole period of growth, from the time they first set until fully grown, the form is exceptionally straight and symmetrical, thus being as choice as a slicing variety as it is for pickles.

The flesh is firm but very crisp and tender at all stages.

We offer it in full confidence that it will please our customers in every particular.

Pkt., 10c.; oz., 20c.; 1-4lb., 60c.; lb., \$2.00.

## Muzzys' Stringless Green Pod Beans.

No bean of recent introduction has given more universal satisfaction than this variety, and its development marks a decided improvement in string beans. The plant is dwarf, large, very vigorous, and matures a heavy yield. The pods are fully twice as large, more fleshy and quite as stringless as those of the Valentine, and mature about the same time. The dry beans are oval, and are chocolate brown. Do not fail to try it.

Pt., 15c.; Qt., 30c.; 4 Qts., 75c.; Bushel, \$4.50.

## FERN BALLS (Davallia Bullata).

We have imported some of these interesting Ferns from Japan. They are easily grown and occupy little space, being suspended in the room. In the fall the leaves die off, and the plants need a rest for two months, during which time it is recommended to keep them out of doors. The frost does not hurt them, but when taking them in, they should be gradually thawed out. We handle only the long-leaved variety.

Price, extra large size, 50c. each; second size, 35c. each.

## COS LETTUCE.

The Cos lettuces are distinct from the preceding sorts, in having long, narrow, spoon shaped leaves, which usually fold into loose sugar-loaf shaped heads, which blanch better by having the outer leaves drawn about them and tied. On account of their exceeding crispness, tenderness and delicate flavor, they are becoming more and more popular in this country.

The leaves are yellowish white in color, long, narrow, upright, folding into a solid head like that of an Early York Cabbage, and very crisp and tender. This is a truly self-blanching lettuce of superior flavor. Sold also as Trianon.

Oz., 20c.; 1-4 lb., 50c.; Lb., \$1.50.

## LIVINGSTON'S MAGNUS.

This very distinct and most promising new variety, of the color of Beauty and Acme, is the latest addition by Livingston to the Tomato family. It is thicker, heavier and more solid than either of the above, making it more easily the most handsome sort in cultivation.

It is unsurpassed in quality and in the production of fine, large fruits. While perfectly adapted to main crop planting, yet it matures so quickly that it will take first rank for early market.

The form is perfect, uniform, large and attractive. Flesh is very firm. It is a robust grower, with short joints, setting its fruit clusters closer together than most varieties, and is, therefore, a heavy cropper. The fruits are very deep from stem to blossom end, many of them being almost globe shaped. It ripens evenly, does not crack about the stem, and the flavor is most desirable.

We have tested it for several years for staking up in the open field, as well as for forcing in greenhouses, and we believe it to be entirely unequalled for such purposes.

Oz., 25c.; 1-4 lb., 75c.; Lb., \$2.75.

# 1902 MUZZY BROTHERS' 1902 Annual Catalogue of Seeds

## ARTICHOKE.

	German, <i>Artichoke</i> ; French, <i>Artichaut</i> ; Spanish, <i>Alcachofa</i> .	Per oz.	¼ lb.	Per lb.
French Globe . . . . .		\$0 35	\$1 00	\$3 50

The seeds should be sown early in the spring, in drills an inch and a half deep and one foot apart. The next spring transplant to permanent beds, in rows or hills three feet apart and two feet between the plants. Plant in a deep, rich, moist loam, and the plants should be protected in winter by a covering of leaves or coarse manure. A bed will continue in bearing for several years.

## ARTICHOKE—JERUSALEM.

Tubers . . . . .	3 lbs. by mail for \$1.00 . . . . .	Per qt.	Per peck
		\$0 20	\$1 00

## ASPARAGUS.

German, *Spargel*; French, *Asperge*; Spanish, *Esparrago*.

	Per oz.	¼ lb.	Per lb.
Columbia, producing pure white shoots . . . . .	\$0 10	\$0 20	\$0 50
Conover's Colossal . . . . .	10	20	50
Palmetto, a light green variety . . . . .	10	20	50
Roots, Colossal . . . . . Two years old, per 100	75;	per 1000,	5 00
" Palmetto . . . . . " " " " "	75;	" " "	6 00
" Columbia . . . . . " " " " "	1 00;	" " "	7 00

Sow the seed early in spring, in drills 15 inches apart, and about a dozen to the foot in the drill; keep the soil mellow and free from weeds during the summer, and in the succeeding spring transplant to permanent beds, which should be done in the following manner, as described by a cultivator of Oyster Bay Asparagus:

"Plant on sandy soil. To grow Asparagus in perfection, the soil need not necessarily be richer than it must be to produce a good crop of Corn. Some experiments have shown that by heavily manuring the crop cannot be made permanently greater than by moderate dressings. It is not desirable to plant them out very early; more plants will fail to grow than when the planting is deferred until the soil is dry and warm.

"In planting for private use, set out in rows two feet apart and allow 12 inches in the row. Set the plants at least six inches below the surface. For market on a large scale, set four feet apart one way and two the other, which will allow the use of a horse and cultivator to keep the weeds under.

"If the plot is made sufficiently rich when the plants are set, they will make a large growth the first summer, and the shoots may be cut from them the succeeding year. Any well treated plot ought to produce a moderate crop the second year after planting. Remove the dead brush late in the fall

Columbia White Asparagus.

or early in the spring of each year, and apply broadcast a dressing of manure. A plot of Asparagus will reach its maturity in its fifth or sixth year; after that the size of the shoots will diminish, but their numbers will increase."

## BEANS—ENGLISH OR BROAD.

German, *Gartenbohne*; French, *Fève de Marais*; Spanish, *Haba*.

	Per pt.	Per qt.	Per peck
Early Mazagan, earliest variety . . . . .	—	\$0 25	\$1 25
Broad Windsor . . . . .	—	30	1 50
Sword Long-pod . . . . .	—	25	1 25

This class is very hardy and should be planted as soon as the soil is in good state in spring. Plant four inches apart and two inches deep, in drills four feet apart. To insure well-filled pods, pinch off the top as soon as the lower pods begin to set.

## BEANS—BUSH OR SNAP VARIETIES.

German, *Bushbohnen*; French, *Haricots nains*; Spanish, *Habichuelas enanas*.

	Per qt.	½ peck.	Per bu.
New Everbearing, prolific, very early (see Novelties) . . . . .	\$0 30	\$1 00	\$5 50
Muzzy's Stringless Green Pod, two weeks earlier than Valentine, very tender . . . . .	30	75	4 50
Marvel Paris, early, long and slender pods, very productive . . . . .	30	1 00	6 50
Livingston's Round Pod Six-Weeks Bean . . . . .	30	1 00	5 50
Early Valentine, early, productive, tender and of excellent flavor . . . . .	25	75	4 00
Early Mohawk, very productive and of good quality . . . . .	25	75	4 00
Early China, very early and of fine quality . . . . .	25	75	4 00
Long Yellow Six-Weeks, early; an excellent variety for general crop . . . . .	25	75	4 00
Ne Plus Ultra, extra early variety for forcing green . . . . .	30	1 00	5 50

## BEANS—BUSH OR SNAP VARIETIES—Continued.

## Burpee's Bush Lima Beans.

	Per qt.	½ pk.	Per bu.
✓ Refugee, or Thousand to One, extensively grown for pickling . . . . .	\$0 25	\$0 75	\$4 00
✓ Long White Kidney, excellent as a shell bean, green or ripe . . . . .	20	75	3 50
✓ White Narrowfat, extensively grown for sale in the dry state . . . . .	20	75	3 50
✓ Golden Refugee, pods round and light color . . . . .	25	75	4 00
✓ Flageolet Green Seed, used as a shell bean when green . . . . .	35	1 25	8 00
✓ Dwarf White Lima . . . . .	35	1 25	8 00
✓ Burpee's Bush Lima, large and flat, very productive . . . . .	35	1 25	7 50

## DWARF WAX VARIETIES.

✓ Thorburn's Valentine Wax, improved extra early Valentine, round wax pods . . . . .	30	1 00	5 50
✓ Wardwell's New Dwarf Kidney Wax, extra early, long pods, very productive . . . . .	30	1 00	5 00
✓ Black Wax, or Butter, pods of a waxy yellow, transparent and very tender . . . . .	30	1 00	5 00
✓ White Wax, beans pure white, pods yellow, tender and rich . . . . .	30	1 00	6 00
✓ Golden Wax. This valuable variety is about 10 days earlier than the Dwarf Black Wax, and the pods are large, long, brittle, entirely stringless . . . . .	30	1 00	5 00
✓ Yosemite Mammoth Wax, the largest pods of all the Wax Varieties . . . . .	40	1 50	9 00
✓ Flageolet Wax Red, pods large and very tender . . . . .	30	1 00	5 50
✓ Algerian Wax, very productive, round pods . . . . .	30	1 00	6 50
✓ Detroit Wax, similar to Golden Wax, less rust . . . . .	30	1 00	5 00

Early Red Valentine Beans.

## BEANS—POLE OR RUNNING VARIETIES.

German, *Slangenbohnen*; French, *Haricots a rames*; Spanish, *Judios*.

	Per qt.	½ pk.	Per bu.
✓ Challenger Lima, potato variety, 5 and 6 in a pod . . . . .	\$0 35	\$1 25	\$7 50
✓ Horticultural Lima, a cross between a Horticultural and Dreer's, being earlier than the Lima . . . . .	30	1 00	6 50
✓ King of the Garden Limas, large pods, very productive . . . . .	35	1 25	7 00
✓ New Early Jersey, very early . . . . .	35	1 25	7 00
✓ Large White Lima, a greatly esteemed variety . . . . .	35	1 25	7 00
✓ Dreer's Improved Lima. This variety has proved to be a decided acquisition . . . . .	35	1 25	7 00
✓ Small White Lima. Small, but good quality . . . . .	35	1 25	7 00

# BEANS—POLE OR RUNNING VARIETIES—Continued.

	Per qt.	$\frac{1}{4}$ pk.	Per bu.
<b>Dutch Case Knife</b> , a very productive variety, and one of the earliest . . . . .	30	1 00	6 00
<b>Horticultural, or Speckled Cranberry</b> , a popular variety for private use, equally, serviceable in the green state or when shelled . . . . .	30	1 00	6 00
<b>Scarlet Runner</b> , beautiful scarlet flowers for ornamental and table use . . . . .	30	1 00	6 00
<b>Black Wax</b> , pods long, thick and fleshy; pale yellow color; waxy appearance; very productive and tender; excellent as a snap or shelled green . . . . .	35	1 25	7 00
<b>Mont d'Or</b> , Golden Wax pods; early . . . . .	35	1 25	7 00
<b>French Yard Long Pods</b> , two or three feet long . . . . .	35		7 00
<b>Flageolet Wax Pole</b> , large yellow, stringless . . . . .	30	1 00	6 50

Sow Bush sorts in drills about two feet apart, and drop the beans about three inches apart in the drills; cover two inches or less; for a succession, sow at intervals of two weeks. Lima beans should not be planted until settled warm weather; make rich hills, four feet apart each way; set a pole eight or ten feet high in each; press the beans into the soil *eye down*, six or eight to each pole, and when they are well up, thin out to four. A quart of Limas is sufficient for 75 or 80 hills, and a quart of Bush Beans will sow a row 100 feet long.

## BORAGE.

German, *Borritsch*; French, *Bourrache*; Spanish, *Berraja*.

	Per oz.	$\frac{1}{4}$ lb.	Per lb.
Used as a pot herb; also as a salad, or can be boiled, and also for garnishing, but chiefly required for claret cups and other cooling drinks. Bees are very partial to the flower . . . . .	\$0 15	\$0 40	\$1 25

## BEET.

German, *Runkelrub*; French, *Betterave*; Spanish, *Remolacha*.

*Early Egyptian Beet.*

	Per oz.	$\frac{1}{4}$ lb.	Per lb.
<b>Dark Red Egyptian</b> , the earliest beet in cultivation, color deep crimson; of excellent quality . . . . .	\$0 10	\$0 20	\$0 50
<b>Extra Early Eclipse</b> , very early, good size . . . . .	10	20	50
<b>Carter's Excelsior</b> . . . . .	10	20	60
<b>Early Flat Bassano</b> , chiefly valuable for its earliness . . . . .	10	20	50
<b>Early Blood Turnip</b> , standard early sort, an excellent variety . . . . .	10	20	50
<b>Edmand</b> , market garden variety, uniform shape, dark . . . . .	10	20	50
<b>Dewing's Blood Turnip</b> , of fine form and flavor . . . . .	10	20	50
<b>Bastian's Blood Turnip</b> . . . . .	10	20	50
<b>Long's Smooth Blood Red</b> , an excellent late variety . . . . .	10	20	50
<b>Swiss Chard</b> , used for its leaves, which are cooked as spinach . . . . .	10	20	50

## BEETS—Continued. MANGEL-WURZEL AND SUGAR.

*Varieties used for feeding stock. Sow 6 lbs. per acre.*

	Per oz.	Qr. lb.	Per lb.
<b>Mammoth Red Mangel-Wurzel</b> , producing roots of mammoth size, very regular, and with a small top . . . . .	\$0 10	\$0 15	\$0 30
<b>Yellow Globe Mangel-Wurzel</b> , roots very large and globular . . . . .	10	15	30
<b>Long Yellow Mangel-Wurzel</b> , good for general crop . . . . .	10	15	30
<b>Golden Tankard Mangel-Wurzel</b> , a new and very valuable variety, of fine form and of very sweet flavor, and bright yellow in color; when cut it shows the interior rings similar to most varieties of garden beet . . . . .	10	15	30
<b>White Silesian Sugar Beet</b> , extensively grown for feeding stock and manufacture of sugar . . . . .	10	15	30
<b>Vilmorin's Improved Sugar Beet</b> , an improved variety . . . . .	10	15	30
<b>Lane's Imperial Sugar Beet</b> , improved variety of the French Sugar Beet, obtained by careful selection in this country . . . . .	10	15	30

A rich, deep, open soil is the best suited to the culture of Beet; fresh manure is undesirable, but land that has been well manured the previous year is highly suitable. For an early supply sow in spring as soon as the ground becomes fit to work, in drills about one foot apart and two inches deep. For main crop sow the first week in May, and for winter use sow in June. When the plants have obtained three or four leaves, thin out, so that they may stand eight or nine inches apart. Keep free from weeds by hand weeding and hoeing. Those intended for winter use may be taken up in October, and stored in dry sand, in the cellar or outhouse. Before storing leaves and fibers must be trimmed off, but care must be taken not to bruise the main root.

## BRUSSELS SPROUTS.

German, *Sprossen-Kohl*; French, *Chou de Bruxelles*; Spanish, *Berza de Brusels*.

	Per oz.	Qr. lb.	Per lb.
<b>Imported Seed</b> (French) . . . . .	\$0 20	\$0 50	\$1 75
<b>Dwarf Improved</b> , a variety producing compact sprouts of excellent quality . . . . .	20	60	2 00

A tender and delicious vegetable. The plant grows two or three feet high, and produces from the sides of the stalk numerous little sprouts, one or two inches in diameter, resembling cabbages. The leaves, which look like the Savoy, should be broken down in the fall, to give the little cabbages room to grow. They are very tender and sweet after early frosts. Sow early in hotbeds, or in seed-beds in May; transplant and cultivate like the cabbage.

## BROCCOLI.

German, *Spragel-Kohl*; French, *Chou Brocoli*; Spanish, *Brocoli*.

	Per oz.	Qr. lb.	Per lb.
<b>Early White</b> , heads medium size, compact, creamy white color, most certain to head . . . . .	\$0 30	\$0 85	\$3 00
<b>Purple Cape</b> , differing from the preceding color, greenish purple . . . . .	40	1 25	4 50
<b>Walcheren</b> , a valuable variety, with very large, firm heads . . . . .	40	1 25	4 00
<b>Mammoth White</b> . . . . .	40	1 25	4 00

A favorite European vegetable, nearly allied to the Cauliflower, but more hardy and surer to head; the seed should be sown in this district in the early part of May, and transplanted in June, farther south the sowing should be delayed until June or July, and the transplanting accordingly from August to October. In parts of the country where the thermometer does not fall below 20 or 25 degrees, Broccoli may be had in perfection from November until March. It succeeds best in a moist and rather cool atmosphere.

## CABBAGE.

German, *Kopfkohl*; French, *Chou*; Spanish, *Berza de reppollo*.

	Per oz.	Qr. lb.	Per lb.
<b>Flat Parisian</b> , New Early Spring . . . . .	\$0 25	\$0 85	\$3 00
<b>Etampes</b> , early French variety, with pointed heads . . . . .	20	50	1 50
<b>Express</b> , very early; small solid heads . . . . .	25	75	2 50
<b>All Seasons</b> , fine variety for second early or late growing; good size . . . . .	25	75	2 50
<b>Early Jersey Wakefield</b> , the leading variety for market in the vicinity of New York; very early, of medium size, good quality, sure to head . . . . .	30	85	3 00

*All Seasons Cabbage.*

<b>Early Flat Dutch</b> . This is one of the best early cabbages in cultivation, producing large, compact heads from 10 to 12 pounds and upward in weight, and of excellent quality . . . . .	25	75	2 50
<b>Early Summer</b> , a valuable early sort, resembling the Early Flat Dutch . . . . .	25	75	2 50
<b>Early Winnigstadt</b> , heads large; one of the best for general use . . . . .	15	50	1 50
<b>Large York</b> , larger and later than the Early York . . . . .	15	50	1 50
<b>Fottler's Improved Brunswick</b> . This is a very fine second early variety . . . . .	20	50	1 50
<b>Henderson's Succession</b> , a good second early and late variety, a sure header; seeds sown in March produce large heads in June . . . . .	30	85	3 00

**CABBAGE—Continued.**

	Per oz.	Qr. lb.	Per lb.
✓ <b>Large Late Drumhead</b> , an excellent fall and winter variety, grows to a large size, with round, compact heads . . . . .	\$0 20	\$0 60	\$2 00
✓ <b>Large Late Flat Dutch</b> , the most popular variety for late cultivation. Large solid heads, broad and flat on top, best to keep . . . . .	20	60	2 00
✓ <b>Vandagaw's Flat Dutch</b> , a sure header, quick growing . . . . .	20	50	2 00
✓ <b>Red Stone Head</b> , used almost exclusively for pickling . . . . .	30	85	3 00
✓ <b>Drumhead Savoy</b> (American), the largest heading sort, of excellent flavor . . . . .	25	75	2 25
✓ <b>Filder Kraut, or Pomeranian Pointed Head</b> . . . . .	20	50	1 50

For very early use plant in the autumn, from 10th to 25th September, in a seed-bed, and protect in cold frames during the winter, being careful to set them down to the first leaf. Transplant in the following spring, as soon as the soil will admit. For autumn and winter use, plant in the seed-bed in May and early part of June, and when six inches high transplant into rich soil, two feet apart each way for the early varieties, and three by two and a half feet for the large winter varieties. To secure the best results, the soil should not be too dry, but should be thoroughly enriched, and the crop should be hoed at least once in 10 days. Sow in heat early in spring, seed of the early kinds for a second crop; also the late varieties for winter use.

**CARROT.**

German, *Moehren*; French, *Carotte*; Spanish, *Zanahoria*.

	Per oz.	Qr. lb.	Per lb.
✓ <b>Early French Forcing</b> , the earliest variety, valuable for forcing; root small and of fine flavor . . . . .	\$0 15	\$0 40	\$1 25
✓ <b>Early Round Parisian</b> , small, for frames or open ground . . . . .	20	50	1 75
✓ <b>Early Scarlet Horn</b> , an old and favorite sort, much esteemed for early summer . . . . .	15	30	1 00
✓ <b>Half Long Danvers</b> , a variety intermediate in size and period of maturity between the preceding and the Long Orange . . . . .	10	30	1 00
✓ <b>Half Long Stump-Rooted Chantenay</b> , like Nantes, broader shoulder . . . . .	15	30	1 00
✓ <b>Half Long Pointed</b> . . . . .	10	30	1 00
✓ <b>Half Long Stump Guerande</b> . . . . .	10	30	1 00
✓ <b>Half Long Stump Nantes</b> . . . . .	15	30	1 00
✓ <b>Carentan</b> , a new early variety, without core. It is an excellent sort for forcing, or used as an early kind for planting in the open ground . . . . .	10	30	1 00
✓ <b>Long Orange Improved</b> , roots of large size, equally adapted for garden or farm culture . . . . .	10	25	80
✓ <b>Large White Belgian</b> , grown almost exclusively for stock . . . . .	10	25	80

The Carrot, like other root crops, delights in a sandy loam, deeply tilled. It should never be sown on newly manured ground, as forked roots are sure to be the result. It is best to sow on ground that has been well manured the previous year for some other crop, such as Celery, Potatoes, Onions or Peas, but avoiding such crops as Cabbage and Turnips, or any of the tap-rooted section. For early or main crops sow the latter part of April; for later crops they may be sown any time until the beginning of June. Sow in rows about 15 inches apart and half an inch deep, thinning out to three or four inches between the plants.

Nantes Carrot.

**CAULIFLOWER.**

German, *Blumen-Kohl*; French, *Chou-fleur*; Spanish, *Coliflor*.

	Per pkt.	Per oz.	Qr. lb.	Per lb.
✓ <b>Extra Early Dwarf Erfurt</b> , short stem; fine . . . . .	\$0 50	\$6 00		
✓ <b>Extra Early Paris</b> . This is one of the earliest and best varieties; heads large white and compact, of fine quality . . . . .	10	75	\$2 00	\$7 50
✓ <b>Early Snowball</b> , admirable for forcing, very solid, pure white heads . . . . .	20	2 25		
✓ <b>Large Early Dwarf Erfurt</b> , the earliest and best of all varieties for forcing . . . . .	25	2 25		

**CAULIFLOWER—Continued.**

Snowball Cauliflower.

**Lenormand's Short Stemmed**, Per oz.  $\frac{1}{4}$  lb. Per lb.  
a late variety, producing very large, well-formed heads of superior quality, 10 cts. per pkt., \$0 75 \$2 00 \$7 50

**Algiers**, popular late variety, sure to head, excellent for market, 10 cts. per pkt. . . . . 75 2 00 7 50

**Early London**, 10 cts. per pkt. . . . . 40 1 25 4 00

Cauliflower delights in a rich, moist soil, and in dry seasons should be abundantly watered. The seeds may be sown in September and wintered over in the same manner as described for early cabbage. Where this is not practicable, it may be had nearly as well by sowing the seeds in the hotbed in January or February and transplanting the plants at two or three inches apart in boxes, or in the soil of another hotbed, until such time as they are safe to be planted in the open ground, which, in this latitude, is usually from the 15th of March to the 10th of April. If properly hardened off, they are seldom injured by being planted out too early.

**CELERY.**

German, *Seleri*; French, *Celeri*; Spanish, *Apio*.

	Per pkt.	Per oz.	$\frac{1}{4}$ lb.	Per lb.
<b>Thorburn's Fin de Siecle</b> (see Novelties) . . . . .		\$0 30	\$0 85	\$3 00
<b>Rose Ribbed Self-Blanching</b> , a sprout of Golden Self-Blanching: very choice . . . . .	\$0 10	35	1 00	3 50
<b>Evans' New Triumph</b> , solid and crisp, fine nutty color. . . . .		20	60	2 00
<b>Giant Pascal</b> , stalks very large, thick and crisp . . . . .		20	50	1 50
<b>Golden Self-Blanching</b> , similar to White Plume, much larger in growth . . . . .	10	40	1 25	4 50
<b>Large Ribbed Kalamazoo</b> , half dwarf white, solid . . . . .		20	50	1 50
<b>White Plume</b> , requires very little banking. . . . .		25	75	2 50
<b>Pink Plume</b> , similar to White Plume, stalks tinged with pink; good keeper . . . . .	10	25	75	2 50
<b>Golden Heart</b> , one of the best for market or private use . . . . .		20	50	1 75
<b>Sandringham Dwarf White</b> , an imported variety of fine flavor; soup greens . . . . .		20	50	1 50
<b>Boston Market</b> , an excellent dwarf-growing white variety . . . . .		20	50	1 50
<b>Crawford's Half Dwarf</b> , excellent for market or private use . . . . .		20	50	1 50
<b>Perfection Heartwell</b> . It is very large and solid, half-dwarf, and full Golden Heart; good market garden variety . . . . .		20	60	2 00
<b>Covent Garden Rose</b> , pink variety, good flavor . . . . .		25	75	2 50
<b>Celery Seed</b> , for flavoring (old seed) . . . . .		05	10	25

The seeds may be sown in the open ground in April, as soon as the ground can be nicely worked. Sow about half an inch deep, and be careful to firmly press the soil over the seed; this should be done by treading over the rows with the feet after sowing; this prevents the air drying up the seed, which thereby loses its vitality and fails to germinate. Many valuable crops are annually lost by inattention to this important particular. After the seed is up, keep carefully clear of weeds until the time of planting, in June or July; the tops may be shorn off once or twice before planting; this makes them "stocky" and they suffer less in being transplanted. After the ground has been well prepared, plant in rows from three to four feet apart, according to the variety, setting the plants about six inches apart, and pressing the soil firmly about the roots; keep free from weeds until the plants are able to take care of themselves. Earth up gradually during their growth, keeping the leaf stalks close together, so that the soil does not get between them. The soil best suited for Celery is a rich, moist loam.

**CELERIAC or TURNIP-ROOTED CELERY.**

German, *Knob-Seleri*; French, *Celeri-Rave*.

**Prague**, or Turnip-Rooted. . . . . Per oz.  $\frac{1}{4}$  lb. lb.  
\$0 15 \$0 50 \$1 50

**Apple Celeriac**.  
An improved variety, nearly round . . . . . 20 60 2 00

Chicory.

CHICORY,

German, *Chicorie*; French, *Chicoree Saur*; Spanish, *Escarola*.  
**Common.** This variety produces the "*Barbe de Capucin*," a salad much used in France. Sown in June, the roots are transplanted in autumn into sand in a cellar; the shoots which will come up soon form the "*Barbe de Capucin*."

Per oz., 10c.; ¼ lb., 30 cts.; lb., \$1.00.

**Large Rooted.** Used to mix with or a substitute for coffee. Cultivation same as the Carrot.

Per oz., 10 cts.; ¼ lb., 20 cts.; lb., 60 cts.

CHERVIL,

German, *Binsenlauch*; French, *Cerfeuil*; Spanish, *Cerafolio*.

	Per oz.	¼ lb.	Per lb.
<b>Curled</b>	\$0 10	\$0 30	\$1 00
<b>Common, or Tuberous Rooted</b>	15	50	1 50

The young leaves are used in soups and salads. Sow thinly in May, in drills half inch deep, one foot apart.

Celeriac.

A variety of Celery having turnip-shaped roots, which may be cooked and sliced, and used with vinegar, making a most excellent salad. It is more hardy, and may be treated in the same manner as Celery.

COLLARDS—Georgia Grown,

German, *Blatter-Kohl*; French, *Chou-Cabu*; Spanish, *Cabu*.

Sow seeds as for Cabbage in June, July and August, for succession. Transplant when one month old in rows a foot apart each way, and hoe often . . . . .

Corn Salad.

CORN SALAD, or FETTICUS.

German, *Ackersalat*, *Lammersalat*; French, *Mache*; Spanish, *Macha Valereanilla*.

	Per oz.	¼ lb.	Per lb.
<b>Large Seeded</b>	\$0 10	\$0 20	\$0 50
<b>Lettuce Leaved</b>	15	30	1 00
<b>Small Seeded</b>	10	20	50

Corn Salad, Fetticus, or Lamb's Lettuce is used to a considerable extent as a salad. It is sown on the first opening of spring in rows one foot apart, and is fit for use in six or eight weeks from the time of sowing. If wanted to come out early in spring, it is sown in September, covered up with straw or hay as soon as cold weather sets in, and is wintered over the same way as Spinach.

CORN—SWEET,

German, *Zucher Welschkorn*; French, *Maise de Sucre*; Spanish, *Maiz de Azucar*.

New Columbus Market Sweet Corn.

	Per ear.	Per qt.	½ pk.	Per bu.
<b>Early Champion</b> , large ears and early . . . . .	\$0 05	\$0 20	\$0 60	\$3 50

<b>Moonachie</b> , very sweet; well-filled ears and productive; general crop		20	60	4 00
<b>Sweet Fodder</b> , for ensilage				2 50

Sweet Corn may be either sown in rows, four and a half feet apart, and the seeds planted at about eight inches in the rows, or planted in hills, at distances of three or four feet each way, according to the variety grown, or the richness of the soil in which it is planted. The taller the variety or the richer the soil, the greater should be the distance apart. The first plantings in this vicinity are made about the middle of May, and successive plantings every two or three weeks until the first week in July. In more southern latitudes planting is begun a month earlier and continues a month later.

Sweet Corn.

**FIELD CORN.**

	Qt. shelled.	Per 100 ears.	Bush. shelled.
<b>Mastodon Dent</b> , very early, strong growing	\$0 15	\$2 00	\$1 75

CRESS.

German, *Kresse*; French, *Cresson*; Spanish, *Mastuerzo*.

	Per oz.	Qr. lb.	Per lb.
<b>Curled Cress or Peppergrass</b> . . . . .	\$0 10	\$0 20	\$0 40
<b>Water Cress</b> . . . . .	35	1 00	3 50

Are excellent for small salads; the leaves while young have a warm, pungent taste. They can be used alone or mixed with Lettuce, Mustard or other salad plants. Sow thickly at frequent intervals for succession, and treat in the same manner as Mustard.

CUCUMBER.

German, *Gurken*; French, *Concombre*; Spanish, *Pepino*.

	Per oz.	Qr. lb.	Per lb.
<b>Cumberland</b> , see novelties . . . . .	\$0 20	\$0 60	\$2 00
<b>Livingston's Emerald</b> , round and smooth, small seed portion. . . . .	10	30	1 00
<b>Fordhook Pickling</b> , prolific, medium size, skin thin . . . . .	10	20	60
<b>Cool and Crisp</b> , very prolific; good for pickling and slicing . . . . .	10	20	60
<b>Thorburn's Everbearing</b> , small size; very early and productive . . . . .	10	25	75
<b>Early Russian</b> , the earliest variety; small and short . . . . .	10	25	75
<b>Nichols' Medium Green</b> , straight and smooth, medium in size; good for early forcing . . . . .	10	20	50
<b>Improved Early White Spine</b> , the best table variety; grows uniformly straight and smooth; dark green; tender and excellent flavored . . . . .	10	20	60
<b>Peerless White Spine</b> , a new variety of the preceding; average length, 10 inches; full at both ends; deep green, holding color until mature . . . . .	10	20	60
<b>Boston Pickling</b> , largely used for forcing by the market gardeners in the vicinity of Boston. It is productive and of superior quality . . . . .	10	20	50
<b>Tailby's Hybrid</b> , a cross between the Early White Spine and an English Frame variety, combining the hardiness of the first with the beauty and size of the latter. . . . .	10	20	60
<b>Early Green Cluster</b> , a short, prickly, seedy variety, bearing in clusters near the root. It is a great bearer . . . . .	10	20	50
<b>Early Short Green</b> , the standard for pickling; medium size, straight and handsome. It makes a beautiful pickle that keeps well . . . . .	10	20	50
<b>Long Green</b> , a very excellent variety; a good bearer, about a foot in length, rather pointed at both ends; dark green, firm and crisp . . . . .	10	20	60
<b>Green Prolific</b> , very prolific, and said by those who have tested it to be the best pickling Cucumber on the market; it is equally desirable as a market Cucumber . . . . .	10	20	50
<b>White Japan</b> , pure white, smooth . . . . .	20	60	2 00
<b>White Pearl</b> , very long; good table variety . . . . .	10	20	60
<b>West India Gherkin or Burr</b> , a very small, oval-shaped prickly variety. It is grown exclusively for pickling, and should always be pickled when young and tender . . . . .	10	25	80

Cucumbers.

Cucumbers succeed best in warm, moist, rich, loamy ground. They should not be planted in the open air until there is a prospect of settled warm weather. Plant in hills about four feet apart each way. The hills should be previously prepared by mixing thoroughly with the soil in each a shovelful of well rotted manure. When all danger from insects is past, thin out the plants, leaving three or four of the strongest to each hill. The fruit should be plucked when large enough, whether required for use or not, as if left to ripen on the vines, it destroys their productiveness.

**English Frame Cucumber**—Per pkt., 25 cts.  
**Improved Sion House. Telegraph. Giant of Arnstadt. Duke of Edinburgh. Gen. Grant. Long Gun. Carter's Tender and True. Swan Neck. Blue Gown.**

These varieties are for growing in hotbeds, or in houses particularly constructed for forcing, so that a supply can be furnished during the winter months, at which time the prices are very remunerative. Sow seeds in November, December,

or January, according to the time they are wanted for market, taking care to give plenty of air and water. It will be necessary to fertilize the pistillate flowers with the staminate in order to render the vines productive, as owing to the absence of insects they will not produce a crop under glass the same as in the ground, where bees and other insects have free access to the flowers.

Dandelion.

**DANDELION.**German, *Pardeblume*; French, *Pisse-en-lit*; Spanish, *Amargon*.

	Per oz.	Qr. lb.	Per lb.
Thick Leaved . . . . .	\$0 45	\$1 25	\$4 50
Best French . . . . .	25	75	2 50
Endive Leaved, new . . . . .	50	1 75	6 00

The Dandelion is much used for spring salads and resembles Endive. Sow the seed in May or June in drills half an inch deep and 12 inches apart. The plants will be ready for use the following spring.

**ENDIVE.**German, *Endevien*; French, *Chicoree*; Spanish, *Endivia*.

	Per oz.	Qr. lb.	Per lb.
Green Curled Winter, very hardy; leaves dark green, tender and crisp . . . . .	\$0 15	\$0 50	\$1 50
Broad-Leaved Batavian ( <i>Escarolle</i> ), chiefly used in soups and stews; requires to be tied up for blanching . . . . .	15	50	1 50
Early White Curled ( <i>Self-Blanching</i> ), the best variety, grows to a large size; very large and tender . . . . .	15	50	1 50
Floss Curled Early Summer, used for salads same as winter varieties . . . . .	15	60	2 00

Endive is one of the best salads for fall and winter use. Sow for an early supply about the middle of April. As it is used mostly in the fall months, the main sowings are made in June and July, from which plantations are formed at one foot apart each way in August and September. It requires no especial soil or manure, and after planting is kept clear of weeds until the plant has attained its full size, when the process of blanching begins. This is effective by gathering up the leaves and tying them by their tips in a conical form with bass matting. This excludes the light and air from the inner leaves, which in the course of three to six weeks, according to the temperature at the time, become blanched. Another and simpler method consists in covering up the plants as they grow with slats or boards, which serves the same purpose by excluding the light, as the tying up.

Green Curled Endive.

**EGG PLANT.**German, *Eierpflanze*; French, *Aupegine*; Spanish, *Berengena*.

Pearl White Egg Plant.

	Per oz.	Qr. lb.	Per lb.
Pearl White, very fine grain and well flavored . . . . . per pkt., 10c.	\$0 35	\$1 00	\$3 50
New York Improved, a superior market variety of large size and fine quality . . . . .	35	1 00	3 50
Early Long Purple, early, of easy culture, hardy, productive; excellent for table . . . . .	20	60	2 00
Early Dwarf Purple, medium size . . . . .	25	75	2 50
Black Pekin, a fine variety, bearing large round, deep purple fruits, fine grained and of superior quality . . . . .	25	75	2 50

The Egg Plant is a tender vegetable, and must not be planted out until the weather is warm and settled. Sow early in spring in hotbeds, or if these are not convenient, sufficient plants may be raised for a small garden by sowing a few seeds in common flower pots or boxes in the house. Plant out early in June from two to three feet apart.

## KALE.

German, *Blatter-Kohl*; French, *Chou Vert*; Spanish, *Breton*.

Per oz. Qr. lb. Per lb.

✓ <b>Siberian, German Greens, or "Sprouts."</b> This variety is extensively used for early greens, for which it is sown in the fall, in rows one foot apart, and treated in the same manner as Spinach; it is ready for use in early spring. Sowing can also be made in spring . . . . .	\$0 10	\$0 20	\$0 60
✓ <b>Dwarf Green Curled Scotch</b> , a beautifully fringed, dwarf-growing kind, with bright green leaves . . . . .	10	25	75
✓ <b>Tall Green Curled Scotch</b> , tall growing, very hardy variety, leaves a bright green, beautifully curled . . . . .	10	25	75
✓ <b>Tall Brown German Curled</b> , a very hardy and useful variety . . . . .	15	30	1 00
✓ <b>Dwarf Brown German Curled</b> . . . . .	10	25	75

Scotch Kale.

Kale may be grown in almost any soil, but the richer it is the more abundant the product. Sow early in spring, in prepared beds, covering the seeds thinly and evenly; transplant in June and treat in the same manner as for Cabbage. Of all the Cabbage tribe this is the most tender and delicate, and would be much more extensively grown than it is if its excellent qualities were generally known. The varieties are all extremely hardy, and are best when touched by frost.

## SEA-KALE.

German, *Seekohl*, *Meerkohl*; French, *Crambe Maritime*; Spanish, *Breton de Mar*.

Per oz. Qr. lb. Per lb.

✓ <b>Sea-Kale Seeds</b> , very much like Celery . . . . .	\$0 25	\$0 75	\$2 50
---	--------	--------	--------

Cultivated for its blanched shoots, which are cooked in the same way as Asparagus. A supply may be had all winter by planting the roots closely in a warm cellar before frost. Sow one inch deep in drills two feet apart; thin out to six inches, and the next spring plant in hills three feet apart, three plants in each.

Early Vienna  
Kohl-Rabi.

## KOHL-RABI.

German, *Kohl-Rabi*; French, *Chou Rave*; Spanish, *Colinabo*.

Per oz. Qr. lb. Per lb.

✓ <b>Early White Vienna</b> , flesh white and tender; best market sort; good for table use . . . . .	\$0 25	\$0 75	\$2 50
✓ <b>Early Purple Vienna</b> , differing from the above in color, which is of a bluish purple . . . . .	30	85	3 00

Kohl-Rabi, or Turnip-stemmed Cabbage, is a vegetable that is not so much cultivated as it deserves to be. The stem above the ground swells into a bulb, somewhat resembling a Turnip; this again is crowned with leaves. The edible part is the bulb, which is dressed and served like Turnip, and is very delicate and tender when young. It is very hardy withstands severe drought, and is a good keeper. Cultivate the same as Cabbage, but in hoeing be careful not to throw dirt into the heart of the plant, or the bulb cannot form.

## LEEK.

German, *Lauch*; French, *Poireau*; Spanish, *Puerro*.

Per oz. Qr. lb. Per lb.

✓ <b>Large American Flag</b> , the kind mostly grown for market . . . . .	\$0 20	\$0 50	\$1 50
✓ <b>Large Carentan</b> , a large-growing French variety of excellent quality . . . . .	20	60	1 75
✓ <b>Large Rouen</b> , very large and fine . . . . .	20	50	1 50

The Leek is very hardy and easily cultivated; it succeeds best in a light, but well-enriched soil. Sow as early in the spring as practicable, in drills one inch deep and one foot apart. When six or eight inches high they may be transplanted in rows ten inches apart each way, as deep as possible, that the neck, being covered, may be blanched. If fine Leeks are desired, the ground can hardly be made too rich.

Flag Leek.

## LETTUCE.

German, *Laitich-Sala*; French, *Laitue*; Spanish, *Lechuga*.*Maximum Lettuce.*

	Per oz.	Qr. lb.	Per lb.
✓ <b>Nansen</b> . . Pkt., 10c.	\$0 40		
✓ <b>Thorburn's Maximum</b> . Large and solid; heat resisting	15	\$0 30	\$1 00
✓ <b>Thorburn Market Garden</b> , private stock; solid large head . . . . .	20	50	1 50
✓ <b>Selected Buttercup</b> , yellow, solid heads, for outdoor forcing .	20	50	1 50
✓ <b>Big Boston</b> , similar to Boston Market, double this size . . .	20	50	1 50
✓ <b>Grand Rapids Forcing</b> , large, tender heads . . . . .	15	40	1 25
✓ <b>Early Curled Simpson</b> , very early and an excellent sort for forcing; is largely grown by the market gardeners . . .	10	30	1 00
✓ <b>California</b> , all heart, new variety, solid head, light green color . . . . .	15	30	1 00
	15	30	1 00

✓ <b>Denver Market</b> , for forcing or open ground; large solid heads . . . . .			
✓ <b>Tennis Ball</b> (black seeded), well-formed heads, hardy and crisp; one of the earliest of the heading varieties . . . . .	15	30	1 00
✓ <b>Tennis Ball or Boston</b> (white seeded), grows very compact, white and crisp; one of the best for forcing or the open ground . . . . .	15	30	1 00
✓ <b>Salamander Head</b> , fine, compact head, resists heat . . . . .	20	50	1 50
✓ <b>Golden Stone Head</b> , small and solid . . . . .	20	50	1 50
✓ <b>Black-Seeded Butter</b> , fine market strain . . . . .	20	50	1 50
✓ <b>Large White Cabbage</b> , excellent for summer; heads of good size . . . . .	15	40	1 25
✓ <b>Black-Seeded Simpson</b> , stands the summer well . . . . .	15	30	1 00
✓ <b>Gray-Seeded Butter</b> , one of the best large heads . . . . .	15	30	1 00
✓ <b>Shotwell's Brown Head</b> , large and handsome . . . . .	30	85	3 00
✓ <b>Trianon Cos</b> , the best of the Cos variety . . . . .	20	50	1 50
✓ <b>American Gathering</b> , a distinct and valuable variety of excellent quality . . . . .	15	30	1 00
✓ <b>White Cos Romaine</b> . Sow early; tie up to blanch . . . . .	20	50	1 50

Lettuce is the most popular of all salads. Boiled, it is quite equal to Spinach, and it is also sometimes used in soups. It is easy of cultivation, but likes a good rich soil. For early use, sow Simpson and Tennis Ball under glass in February and March, and transplant as soon as the ground can be worked. Later, sowing may be made in the open ground for succession as long as the weather permits; thin out well, or the plants will be weak, and set in rows two feet apart and eight inches between the plants. The best early plants are obtained by sowing in the open ground in September, and transplanting to cold frames the latter part of October, being wintered over in the same manner as early Cabbage. Lettuce requires good ground and abundant moisture.

## MARTYNIA.

A strong-growing annual plant, bearing curiously shaped seed pods, which when young and tender make excellent pickles. Sow in the open ground in May, and thin out the plants to two or three feet apart, or a few seeds may be sown in a hotbed and afterward transplanted. Per oz., 25c.; qr. lb., 75c.; lb., \$2.50.

## MELON MUSK.

German, *Melone*; French, *Melon*; Spanish, *Melon Muscatel*.

	Per oz.	Qr. lb.	Per lb.
✓ <b>Paul Rose</b> . Handsome, oval, orange flesh, sweet . . . . .	10	\$0 20	\$0 60
✓ <b>Livingston's Tip Top</b> . Very sweet . . . . .	10	20	60
✓ <b>Long Island Beauty</b> , similar to Hackensack; very early . . . . .	15	30	80
✓ <b>Winter Pineapple</b> , flesh light green color, flavor of pineapple, does not ripen on the vine . . . . .	15	40	1 25
✓ <b>The Banquet</b> , color of flesh dark, rich salmon . . . . .	10	25	70
✓ (5) <b>Miller's Cream, or Osage</b> , flesh a salmon color and very thick . . . . .	10	20	60
✓ <b>Golden Netted Gem</b> , early, small, fine flavor . . . . .	10	20	60
✓ (3) <b>Hackensack</b> , variety of Green Citron, well known among the New York market gardeners, grows to a very large size, productive, exquisite flavor . . . . .	10	20	60
✓ <b>Montreal Market</b> , green flesh, very thick; fine flavor . . . . .	10	20	60

## MUSKMELON—Continued.

- ✓ **Baltimore Market**, oblong; orange flesh. Per oz., 10 cts.; qr. lb., 20 cts.; per lb., 60 cts.
- ✓ **Delmonico**, oval, deeply netted; orange flesh. Per oz., 10 cts.; qr. lb., 20 cts.; per lb., 60 cts.
- ✓ **Chicago Nutmeg**, large, fine grade. Per oz., 10 cts.; qr. lb., 20 cts.; per lb., 60 cts.
- ✓ **Orange Christina**, very clear, excellent sort; green, with yellow flesh. Per oz., 15 cts.; qr. lb., 20 cts.; per lb., 60 cts.
- ✓ **Bay View**, a new green-flesh variety of large size and superior quality. Per oz., 10 cts.; qr. lb., 20 cts.; per lb., 60 cts.
- ✓ **Surprise**, a very fine new variety; flesh salmon colored and of exquisite flavor. Per oz., 10 cts.; qr. lb., 20 cts.; per lb., 60 cts.

Muskmelons.

	Per oz.	Qr. lb.	Per lb.
(1) <b>Jenny Lind</b> , a very early kind, of small size, but delicious flavor . . . . .	\$0 10	\$0 20	\$0 50
<b>White Japan</b> , size medium and nearly round; skin cream-white and very thin; flesh pale green; early and sweet . . . . .	10	20	60
(2) <b>Long Yellow Cantaloupe</b> , yellow flesh; suitable for the work . . . . .	10	20	60
<b>Pomegranate</b> , for perfume. Not edible . . . . .	15	40	1 25
<b>Nutmeg</b> , fruit nutmeg shape; skin deep green, finely netted; flesh greenish yellow, rich and sugary . . . . .	10	20	50

Melons thrive best in a moderately enriched live soil; the hills should be six feet apart each way. Previous to planting incorporate well with the soil in each hill a couple of shovelfuls of thoroughly rotted manure; plant twelve or fifteen seeds in each hill early in May, and when well up, thin out to three or four of the most promising. Pinch off the leading shoots as the growth becomes too luxuriant, and if the fruit sets too numerous, thin out when young, which will increase the size of those remaining, and cause them to ripen quicker.

Paul Rose Melon.

## MELON, WATER.

German, *Wassermelone*; French, *Melon d'Eau*; Spanish, *Zandia*.

	Per oz.	Qr. lb.	Per lb.
✓ <b>Ruby Gold</b> , flesh yellow and red . . . . .	\$0 10	\$0 25	\$0 75
✓ <b>Kolb's Gem</b> , nearly round, dark green . . . . .	10	20	50
✓ <b>Seminole</b> , a new early variety. Long striped sort . . . . .	10	20	50
✓ <b>Pride of Georgia</b> , dark green, oval in shape; crisp and sweet; very large . . . . .	10	20	50
✓ <b>Scaly Bark</b> , thin rind; flesh light crimson . . . . .	10	20	50
✓ <b>Mountain Sweet</b> , one of the very best for general culture; color dark green; rind thin; flesh scarlet, solid, very sweet and delicious . . . . .	10	20	50
✓ <b>Black Spanish</b> , shape round, rather small; skin dark green; flesh red, sweet and rich . . . . .	10	20	50
✓ <b>Phinney's Early</b> , flesh deep red, of very superior quality; a valuable early market variety . . . . .	10	20	60
✓ <b>Cuban Queen</b> , solid and heavy . . . . .	10	20	50

**MELON, WATER—Continued.**

	Per oz.	Qr. lb.	Per lb.
<b>Ice Cream</b> ( <i>white seeded</i> ), fruit of medium size, nearly round; skin pale green; rind thin; flesh scarlet, solid, crisp, excellent	\$0 10	\$0 30	\$0 50
<b>Rattlesnake</b> , very large, striped, red flesh variety	10	20	50
<b>Citron</b> , round, handsome fruit of small size, and used in the making of sweetmeats and preserves	10	20	60
<b>Volga</b> , pale green; red flesh	10	25	75
<b>Mammoth Iron-Clad</b> , long and large; thin skin; deep red flesh	10	20	60
<b>The "Boss,"</b> oblong; dark green	10	20	60

Plant in hills as directed for Muskmelons, giving them more room, as their vines extend much farther. If they are wanted of a large size, three or four melons to each plant will be sufficient, and when only one is allowed to grow from each plant they will grow to an immense size.

**MUSTARD.**

German, *Senf*; French, *Moutarde*; Spanish, *Mostaza*.

	Per oz.	Qr. lb.	Per lb.
<b>White London</b> , best for salads	\$0 05	\$0 10	\$0 25
<b>Black</b> , used for cooking and for salads	05	10	25

Mustard in the green state is a refreshing salad, mixed with Cress, Lettuce, or other salad plants. It is necessary to make frequent sowings of it, as it should be cut and used in a very young state, even before the first rough leaf has appeared. The seed should be sown thickly in light soil, the surface of which should be made very smooth. The seed should be pressed into the soil with the back of a clean spade, and should then be watered through the fine rose of a watering pot, without having any soil placed upon it; but the bed should be covered for a few days with a piece of cloth or mat, and in the course of six or eight days the Mustard will be fit for use, and should be cut close to the surface of the soil with a sharp knife; and no soil having been placed over the seeds, it will be found clean and free from grit.

**MUSHROOMS.**

German, *Champignonbrut*; French, *Champignon*; Spanish, *Hongo*.

<b>Virgin Spawn</b> , in tablets, new	10 cts. a tablet
<b>Imported English Spawn</b>	15c. per lb.; 10 lbs., \$1.00; 100 lbs., \$9.00
<b>Imported French Spawn</b>	3-lb. box, \$1.20

Mushrooms should be grown either in a building especially erected for the purpose or some shed, stable or cellar, where a temperature of from 40 to 60 degrees can be kept up in winter. To every barrow load of fresh horse droppings add about the same weight of loam or soil of any kind that has not been manured. Turn the heap every day, so that it is not allowed to heat violently, until you have quantity enough to form a bed of the dimensions required. Be careful that your heap is under cover, so that it cannot possibly get wet.

The most convenient size for a bed is from three to four feet long and eight inches deep.

Prepare the mixture of loam and manure, making the bed in layers, and pounding down each with the back of a spade. Leave this to heat through for a few days, and as soon as the heat subsides to 90 degrees, make holes in the bed about a foot apart each way, into which put pieces of the spawn, two or three inches in diameter; fill up the holes with the compost and at the expiration of a week or ten days the spawn will have thoroughly diffused itself through the bed. Now spread a layer of fresh soil over the heap to the depth of two inches, firm it down moderately, and cover with three or four inches of hay or straw. Examine the bed often to see that it does not get dry. When water is given it should be at a temperature of about 100 degrees.

*Mushrooms.*

**NASTURTIIUM.**

German, *Nasturtium*; French, *Capucine*; Spanish, *Maranuela*.

	Per oz.	Qr. lb.	Per lb.
<b>Tall Scarlet</b>	\$0 15	\$0 30	\$1 00
<b>Tall Yellow</b>	15	30	1 00
<b>Tall Nasturtium, Mixed</b>	10	25	75
<b>Dwarf Nasturtium, Mixed</b>	10	30	1 00

Cultivate both for use and ornament; the green seed pods preserved in vinegar make an excellent pickle. The young leaves are also useful in salads. Its beautiful scarlet and orange-color flowers, which bloom freely all summer, add a charm to the garden.

## ONION.

German, *Zweibel*; French, *Oignon*; Spanish, *Cebolla*.*Yellow Globe Danvers Onion.*

	Per oz.	Qr. lb.	Per lb.
✓ <b>Australian Brown</b> , earlier than the red Wethersfield; a good keeper . . . . .	\$0 15	\$0 30	\$0 90
✓ <b>Early Red</b> , flat; about ten days earlier than the Large Red, and not quite so large . . . . .	15	50	1 50
✓ <b>Large Red Wethersfield</b> , the staple variety of the Eastern onion growers; of large size, deep in color, and a good keeper . . . . .	15	50	1 25
✓ <b>Yellow Globe Danvers</b> , an excellent variety; mild flavored and very productive; ripens early and a good keeper . . . . .	15	40	90
✓ <b>White Portugal, or Silver Skin</b> , a handsome onion of mild flavor; extensively grown for pickling . . . . .	25	75	2 50
✓ <b>Griswold's Medium Early Red Globe</b> , about two weeks earlier than Southport Red Globe . . . . .	15	50	1 50
✓ <b>Southport Red Globe</b> , similar to the Large Red in color and flavor, but quite distinct in form, being nearly globular . . . . .	15	50	1 40
✓ <b>Southport White Globe</b> , form nearly ovoid, very symmetrical, keeps well, is an excellent variety . . . . .	25	75	2 50
✓ <b>Southport Yellow Globe</b> , same as the above, except in color . . . . .	15	50	1 25
✓ <b>White Flat Bermuda</b> . Very early . . . . .	30	85	3 00
✓ <b>Red Flat Bermuda</b> . Very early . . . . .	30	85	3 00

## Italian Varieties.

✓ <b>Adriatic Barletta</b> , white, new variety, fully two weeks earlier than the Queen . . . . .	30	85	2 75
✓ <b>Early Queen</b> , an excellent variety, very early, a good keeper and mild flavored . . . . .	30	85	2 50
✓ <b>Giant Rocca</b> , a splendid large variety from Naples, of globular shape, bright brown skin and delicate flavor . . . . .	20	50	1 50

The Onion thrives best in a rather strong, deep, rich, loamy soil, and, unlike most vegetables, succeeds well when cultivated on the same ground for successive years. The ground should be deeply trenched and manured the previous autumn, and laid up in ridges during the winter to soften. As early in spring as the ground is in working order, commence operations by leveling the ground with a rake, and tread it firmly; sow thinly in drills about a quarter of an inch deep and one foot apart; cover with fine soil and press down with the back of a spade or a light roller. When the young plants are strong enough, thin gradually, so that they stand three or four inches apart. Keep the surface of the ground open and free from weeds by frequent hoeing, taking care not to stir the soil too deeply nor to collect it about the growing bulbs.

*Barletta Onion.*

ONION SETS.

Potato Onion Sets.

	Per qt.	½ pk.	Per pk.
White Onion Sets . . . . .	\$0 25	\$0 75	\$1 25
Yellow Onion Sets . . . . .	20	60	1 00
Red Onion Sets . . . . .	20	60	1 00

Shallots . . . . .	25	75	1 25
Red Top Onions . . . . .	20	60	1 00

OKRA, or GUMBO.

German, *Essbarer Safran* ; French, *Gombo* ; Spanish, *Quibombo*.

	Per oz.	¼ lb.	Per lb.
Improved Dwarf White, long slender pods, very productive and only 14 inches high . . . . .	\$0 10	\$0 20	\$0 50
Dwarf Green, early and productive . . . . .	10	20	50
Long Green, fine long pods, very good . . . . .	10	20	50

The pods in a young state are used in soups, sauces and stews, and are very wholesome and nutritious. It is of the easiest culture and grows freely, bearing abundantly when grown in ordinary garden soil. It is sown at the usual time of all tender vegetables in drills two inches deep, setting the plants from two to three feet apart.

PARSLEY.

German, *Petersilie* ; French, *Persil* ; Spanish, *Perjil*.

	Per oz.	¼ lb.	Per lb.
Extra Double Curled, a fine dwarf variety, excellent for garnishing . . . . .	\$0 10	\$0 25	\$0 75
Fern Leaved, the most beautiful form of Parsley, resembling crested fern or moss in its growth . . . . .	10	25	75
Plain, leaves plain, hardier than the curled variety . . . . .	10	20	50
Hamburg, or Rooted; the roots are for flavoring soups, etc. . . . .	10	20	60
Moss Curled . . . . .	10	25	75

Dwarf Green Okra.

Should be sown very early in spring, in beds or in lines, and the seeds, which are somewhat slow to vegetate, should be previously soaked 24 hours in warm water. The soil should be kept free from weeds, which should be extracted by the hand, so as to avoid disturbance to the seeds when about to germinate. As soon as the plants are large enough they should be thinned out so as to stand five or six inches rpart.

PARSNIP.

German, *Pastinake* ; French, *Panais* ; Spanish, *Chirivia*.

	Per oz.	¼ lb.	Per lb.
Guernsey or Cup, leading variety . . . . .	\$0 10	\$0 20	\$0 50
Long Smooth, or Hollow Crown, long roots . . . . .	10	20	50
Long White, standard variety . . . . .	10	20	50

Moss Curled Parsley.

## PARSNIPS—Continued.

Parsnips are largely used both as a garden vegetable and for the farm. They are very nutritious, and cattle fed upon them fatten rapidly; while in cows they produce a larger yield of milk, having a rich color and affording butter of excellent quality. They succeed best in a deep rich soil that has been well manured the previous season, as manure freshly applied tends to the production of forked and ill-shaped roots. Sow the seed early in spring in drills eighteen inches apart in the garden, and three feet apart in the field, and thin the plants to six inches in the drill.

## PEAS.

German, *Erbse*; French, *Pois*; Spanish, *Guisantes*.

### Extra Early Varieties.

	Per qt.	½ pk.	Per bu.
✓ <b>Gradus</b> , earliest large-podded pea in cultivation, . . . . .	\$0 50	\$1 75	\$12 00
✓ <b>Allan's Sunol</b> , very early and productive, height 2½ feet . . . . .	30	1 00	6 00
✓ <b>Nott's Excelsior</b> , extra early dwarf wrinkled, pods larger than American Wonder . . . . .	35	1 25	7 50
✓ <b>American Wonder</b> , earliest wrinkled variety . . . . .	35	1 25	7 00
✓ <b>Alaska</b> , very early and retain their color well . . . . .	30	1 00	6 00
✓ <b>Earliest of All</b> , earliest Blue Marrow now offered . . . . .	30	85	5 50
✓ <b>First and Best</b> , a very fine early variety, 3 feet . . . . .	25	75	4 75
✓ <b>Rural New Yorker</b> , height 2½ feet, pods fine shape, well filled, six to nine peas in a pod . . . . .	25	75	5 50
✓ <b>Improved Daniel O'Rourke</b> , a favorite early variety, 2½ feet . . . . .	30	1 00	6 00
✓ <b>Philadelphia</b> , resembling First and Best. . . . .	25	75	4 75
✓ <b>Little Gem</b> , a dwarf green wrinkled Marrow, very prolific, of superior flavor, and a first early. 1 foot . . . . .	30	1 00	7 50
✓ <b>Premium Gem</b> , very early, well filled pods, one foot high . . . . .	30	1 00	7 50
✓ <b>Alpha</b> , extra early blue wrinkled Marrow Pea of fine quality, and very prolific, pods large and well filled, three feet . . . . .	30	85	5 00
✓ <b>Blue Peter</b> , an excellent dwarf and a very early variety, 1½ feet . . . . .	30	85	5 00

### Second Early Varieties.

✓ <b>Heroine Medium Early</b> , green wrinkled . . . . .	30	85	5 00
✓ <b>Everbearing</b> , good-size pea, long pod. . . . .	30	85	5 00
✓ <b>McLean's Advancer</b> , early green wrinkled varieties, delicious flavor, 2 feet. . . . .	Per qt. \$0 30	½ pk. \$0 85	Per bu. \$5 00
✓ <b>Prince of Wales Heavy Cropper</b> , fine flavor . . . . .	25	75	4 50
✓ <b>Pride of the Market</b> , very large pod, green peas, sow thin. . . . .	30	85	5 00
✓ <b>Yorkshire Hero or Dwarf Champion</b> , 2½ feet . . . . .	30	85	5 00
✓ <b>Abundance</b> , 18 inches high, 6 to 8 peas in pod, large and wrinkled . . . . .	30	85	5 00

### General Crop.

✓ <b>Champion of England</b> , one of the best and most popular Peas, 5 feet. . . . .	25	75	4 50
✓ <b>Paragon</b> , large producer, double podded . . . . .	30	85	5 00
✓ <b>Ne Plus Ultra</b> , a popular wrinkled variety. . . . .	25	75	4 50
✓ <b>Dwarf Sugar</b> , edible pods, 2 feet. . . . .	30	1 00	6 00
✓ <b>Tall Sugar</b> , edible pods, a fine-flavored variety, can be used in the green state like string beans . . . . .	35	1 25	7 00
✓ <b>Mam Grey Sugar</b> , edible pods. . . . .	35	1 25	7 00
✓ <b>Carter's Telephone</b> . . . . .	30	85	5 00
✓ <b>Black-Eyed Marrowfat</b> , grown for market, hardy, productive, 4 feet . . . . .	20	60	3 00
✓ <b>White Marrowfat</b> , an old and favorite sort for market, 4 feet . . . . .	20	60	3 00
✓ <b>Telegraph</b> , large pods and peas. . . . .	25	75	4 25
✓ <b>Carter's Stratagem</b> , mammoth pods, well filled. . . . .	30	85	5 00
✓ <b>St. Disirat</b> , melting sugar; edible pod; <b>New</b> . qt., 75c. . . . .	Pkg., 10c.; pt., 40c.;		

Allan's Sunol.

PEAS—Continued.

Peas come earlier to maturity in light rich soil. For general crop a deep rich loam, or strong loam, inclining to clay, is best. For early crops decomposed leaves or leaf mould should be used, or if the soil is very poor, strong manure may be employed. For general crops a good dressing should be applied, and for the dwarf growing kinds the soil can hardly be too rich. When grown as a market crop, Peas are not staked, but sown in single rows, two or three inches deep, two to three feet apart, according to the variety. When grown in small quantities, for private use, they are generally sown in double rows six or eight inches apart and the rows three feet apart, the tall varieties staked up by bush. For an early crop, sow as soon as the ground can be worked, and make repeated sowings every two weeks for succession. A quart is sufficient for a row of about eighty feet.

Peppers.

✓ <b>Long Yellow Cayenne</b> , similar to Long Red, except in color . . . . .			
✓ <b>Cardinal</b> , mild, thick fleshed, new . . . . .			
✓ <b>Chili</b> , very piquant and prolific; fruit conical; bright scarlet . . . . .			
✓ <b>Cherry Red</b> , very ornamental variety; a rich glossy scarlet; piquant . . . . .			
✓ <b>Cranberry</b> , one of the best for pickles . . . . .			
✓ <b>Oxheart</b> , heart shaped, very fine, excellent for pickling . . . . .			
✓ <b>Golden Dawn Mango</b> . This is a remarkably prolific Pepper of the Bell class, and of a magnificent golden color . . . . .			
✓ <b>Giant Emperor</b> . This sort bears scarlet fruit six inches long and a quarter of an inch thick . . . . .			
The pepper or capsicum is valuable for its seasoning qualities, as well as for pickling. Sow early in heat and transplant when the weather is warm and settled; or sow in warm situation in the garden about middle of May. Plants should be set a foot and a half apart.			

PEPPER.

POTATO.

German, *Kartoffel*; French, *Pomme de Terre*; Spanish, *Patata*.

Houlton Rose and Hebron Potatoes—Planted in Rows.

<b>Pride of Ireland</b> . Late variety, good keeper, skin white, introduced last season . . . . .	Per Bu.	Per bbl
<b>Seneca Beauty</b> . Long potato, very smooth . . . . .	\$2 00	\$4 00
	2 00	4 00

**POTATO—Continued.**

<b>Houlton Bliss Triumph</b> , red skin, very early and productive . . . . .	}	Prices on application.
<b>Houlton Hebron</b> , white skin, the most popular variety in cultivation . . . . .		
<b>Houlton Rose</b> . The Standard Variety. Our specialties . . . . .		
<b>Houlton Pearl of Savoy</b> , very early, cross between Clark No. 1 and early Vermont . . . . .		
<b>Houlton Early Queen</b> , . . . . .		
<b>Houlton Green Mountain</b> , late variety, good keeper, white and mealy . . . . .		

The foregoing varieties are grown for us at Houlton, Aroostook Co., Me., are the choicest stock ever offered. Coming from the extreme northern part of Maine, and raised without the aid of manure, causes them to have very strong eyes and to be hardy and very smooth. Productiveness unsurpassed. The following are raised for us in Washington County, northern New York:

	Per bu.	Per bbl.
<b>Thorburn</b> , very early, very productive . . . . .	\$2 50	\$4 50
<b>Rural New Yorker</b> , No. 2 . . . . .	2 00	4 50
<b>Early Ohio</b> , a seedling of the Early Rose, ripening a week earlier . . . . .	2 50	4 50
<b>Early Maine</b> . . . . .	2 00	4 00

**PUMPKIN.**

German, *Kuerbis*; French, *Courge*; Spanish, *Calabaza Totanera*.

	Per oz.	Qr. lb.	Per lb.
<b>Calhoun</b> , flesh wonderfully thick and fine grained, cooks very yellow . . . . .	\$0 10	\$0 25	\$0 75
<b>Large Cheese</b> , the best variety, hardy and productive . . . . .	10	20	50
<b>Connecticut Field</b> , very productive, largely grown for feeding stock. 15c. per qt.; per bush., \$3 00.			
<b>Mammoth King</b> , grows to an immense size . . . . .	15	50	1 50
<b>Sugar Pumpkin</b> . . . . .	10	20	50
<b>Cushaw</b> , salmon color, crooked neck . . . . .	10	25	70
<b>Mammoth Tours</b> , very large . . . . .	10	25	75

These are usually planted in fields of Corn or Potatoes, but may be profitably raised in fields by themselves. Sow in May, in hills eight feet apart.

**RADISH.**

German, *Retting*; French, *Radis*; Spanish, *Robanitos*.

✓ <b>Black Spanish Winter</b> , long, one of the hardiest and best for Winter use . . . . .	10	20	60
✓ <b>Black Spanish Winter</b> , round . . . . .	10	20	60
✓ <b>Giant Stuttgart</b> , Summer favorite, German sort . . . . .	10	25	75
✓ <b>California Mammoth White</b> , a giant white-fleshed Fall Radish . . . . .	10	20	50
✓ <b>Long White Naples</b> , flesh white, crisp, and mild . . . . .	10	25	75
✓ <b>White Spanish</b> , long, rather milder than Black . . . . .	10	25	75
✓ <b>White Strasburg</b> , very large, German sort . . . . .	10	25	75

Scarlet White Tip Radish.

There are two classes of Radishes, those for Spring and Summer use, which are small and arrive quickly at maturity, and those for Winter use, which are large and mature slowly, and with proper care can be kept all Winter. The Summer Radishes should be used while young and tender; if allowed to grow too long they become tough and stringy; they thrive best in a light, rich soil. For a successive supply, sow from the middle of March until September, at intervals of two or three weeks. For an early supply, they may be sown on a mild hotbed in February. The Winter varieties may be sown from the latter part of July to the middle of September.

RHUBARB.

German, *Rabarber*; French, *Rhuberbe*; Spanish, *Ruibarbo*.

	Per oz.	Qr. lb.	Per lb.
✓ <b>Linnaeus</b> , early, large and tender . . . . .	\$0 20	\$0 50	\$1 50
✓ <b>Victoria</b> , very large, later than Linnaeus . . . . .	20	50	1 50
✓ <b>Roots</b> . . . . .	10 cts. each; \$1.00 per doz.		

Sow early in Spring, in drills a foot apart, thinning out to about the same distance apart in the rows when a few inches high. In Fall or following Spring, transplant into deep, rich soil, about three feet apart each way.

SPINACH.

German, *Spinat*; French, *Spinard*; Spanish, *Espinaca*.

	Per oz.	Qr. lb.	Per lb.
✓ <b>Long Standing</b> , Round Leaved . . . . .	\$0 10	\$0 15	\$0 35
✓ <b>Flander's Round Leaved</b> , the variety commonly grown, good for Spring or Fall sowing . . . . .	10	15	35
✓ <b>Large Viroflay</b> , a new variety, with leaves much larger and thicker than the old variety . . . . .	10	15	35
✓ <b>Victoria New</b> , dark green color, sow early . . . . .	10	15	35
✓ <b>Savoy Leaved</b> , a large, curled, thick leaved variety, the market gardener's favorite . . . . .	10	15	35
✓ <b>Prickly</b> , prickly seeded, with triangular arrow-shaped leaves . . . . .	10	15	35
✓ <b>New Zealand</b> , produces leaves in great abundance throughout the Summer; should be raised in heat and transplanted three feet apart each way into light rich soil . . . . .	10	30	1 00

Sow in Fall for Spring use, in drills a foot apart, thinning out the plants to three inches apart in the rows. Spinach is very hardy and does not require protection except in very exposed places, where a covering of straw or leaves is useful. For Summer use sow as early as possible in Spring, and at frequent intervals during the season for succession.

SALSIFY, or OYSTER PLANT.

German, *Bocksbart*; French, *Salsifis*; Spanish, *Salsifi*.

	Per oz.	Qr. lb.	Per lb.
✓ <b>Long White French</b> . . . . .	\$0 15	\$0 40	\$1 25
✓ <b>Mammoth Sandwich Island</b> . . . . .	15	50	1 50

This very nutritious vegetable requires the same cultivation as Carrots or Parsnips. It is quite hardy and the roots may remain in the ground all Winter; a quantity can be taken up and packed in earth or sand, and stored away for use when needed. It makes a fine soup, like the oyster. It is also half-boiled, grated fine, made into small balls, dipped into butter, and fried.

### SCORZONERA—Black Oyster Plant.

German, *Schwarzwurzel*; French, *Scourge*; Spanish, *Escorzonera*.

This vegetable requires the same treatment as Salsify, which it nearly resembles.

Per oz., 30c.; Qr. lb., 85c.; Per lb., \$3.00

*Salsify.*

### SQUASH.

German, *Garten Kuerbiss*; French, *Courge*; Spanish, *Calabaza Bonetera*.

	Per oz.	Qr. lb.	Per lb.
✓ <b>Faxon</b> , medium size, orange flesh, and early . . . . .	\$0 10	\$0 20	\$0 60
✓ <b>Mammoth Summer Crook Neck</b> , twice size of Summer Crook Neck . . . . .	10	20	60
✓ <b>Fordhook Squash</b> , bright yellow, good keeper . . . . .	10	25	75
✓ <b>The Sibley</b> , solid, thick, brilliant orange in color . . . . .	10	20	60
✓ <b>Early Golden Bush Scallop</b> , early, excellent for shipping . . . . .	10	20	60
✓ <b>Early White Bush Scalloped</b> , a white variety of the above . . . . .	10	20	60
✓ <b>Summer Crook Neck</b> , early, productive, and of good quality . . . . .	10	20	60
✓ <b>Canada Winter Crook Neck</b> , flesh close grained, sweet and fine flavored . . . . .	10	20	60
✓ <b>Green Striped Bush</b> , white, with green stripes . . . . .	10	25	75
✓ <b>Boston Marrow</b> , a very valuable medium early variety, an excellent keeper and of superior quality . . . . .	10	20	60
✓ <b>Hubbard</b> , the best Winter Squash, fine grained, dry, keeps well, and is of excellent flavor . . . . .	15	30	1 00
✓ <b>Pineapple</b> , white skin and flavor . . . . .	10	25	75
✓ <b>Marble Head</b> , a superior Winter variety, large, productive, fine grained and sweet . . . . .	10	25	75
✓ <b>Butman</b> , a superior new Winter variety, very dry, fine grained and productive, excellent flavor, keeps well . . . . .	10	25	75
✓ <b>Turban</b> , flesh orange-yellow, excellent Fall Squash . . . . .	15	30	1 00
✓ <b>Mammoth Chili</b> , grows to a large size, often weighing two hundred pounds, excellent for stock . . . . .	15	40	1 25
✓ <b>Vegetable Marrow</b> , a favorite English sort, skin greenish yellow, flesh white, soft and of rich flavor . . . . .	15	30	1 00

Squashes are divided into two classes, Summer and Winter. The Summer varieties come into use about midsummer, and are eaten when the rind and flesh are young and tender. The Winter varieties are left on the vines until they are thoroughly ripe, gathered in the Fall, and stored away for Winter use. If well ripened and kept in a good cellar, they can be preserved until May. Prepare hills for the seeds by incorporating two or three shovelfuls of well-rotted manure with the soil, for each hill. For the bush varieties, from three to four feet each way, and for the running sorts from six to eight feet. Eight or ten seeds should be sown to each hill, thinning out after they have attained their rough leaves, leaving three or four of the strongest plants.

### TOBACCO.

**Connecticut Seed Leaf.** This variety is best adapted to the climate of the Northern and Middle States.

Per oz., 25c.; Qr. lb., 50c.; Per lb., \$1.50

**Havana**, imported seed. Vuelto de Abajo . . . . . Per oz., 40c.; Qr. lb., \$1.50; Per lb., \$4.00

*White Bush Squash.*

Tobacco seed may be started in a hotbed, or sown in the open ground, as early in Spring as the ground can be worked. Prepare a bed in rich dry ground, with a southern exposure; the bed should be burned over to kill the seeds of weeds and wild grasses, or they will spring up before the Tobacco plants and destroy them. After this is done, rake it off fine and sow the seed. A tablespoonful is sufficient for one hundred square yards. Sow broadcast, and hand roll, or press down the soil evenly and firmly. When the young plants appear, keep free from weeds and water frequently. If the weather is dry, set out about the first of June, in land that has been heavily manured. Tobacco thrives best in a light, rich, sandy or gravelly soil. Plant about three feet apart. Look out for the "Tobacco worm," which must be removed as fast as it appears, or it will quickly destroy the crop.

TOMATO.

German, *Liebesapfel*; French, *Tomote*; Spanish, *Tomata*.

**Magnus.** See Novelties.

<b>Yellow Cherry</b> , similar to the above except in color . . . . .	25	75	2 50
<b>Strawberry or Winter Cherry</b> , excellent for preserving, will keep all winter . . . . .	20	60	2 00

The seed should be sown in a hotbed about the first week in March, in drills five inches apart and half an inch deep. When the plants are about two inches high, they should be set out four or five inches apart in another hotbed, or removed into small pots, allowing a single plant to a pot. About the middle of May the plants may be set in the open ground, at a distance of three to four feet apart, in hills in which a good shovelful of rotted manure has been mixed. Water freely at the time of transplanting, and shelter from the sun for a few days until the plants are established. Sufficient plants for a small garden may be started by sowing a few seeds in a shallow box or flower pot, and placing it in a sunny window of the room or kitchen.

Red Top Strapleaf Turnip.

TURNIP.

German, *Rube*; French, *Navet*; Spanish, *Nabo*.

✓ <b>Laing's Improved</b> , globe-shaped, with a small top and tap root . . . . .	10	20	50
✓ <b>Skirving's</b> , an improved purple-topped variety of large size . . . . .	10	15	50

For the Spring crop, commence sowing early varieties as soon as the ground can be worked, in drills fourteen inches apart; thin out the plants to five or six inches apart. Keep clear from weeds, and when the bottoms begin to enlarge, brush away the earth from about the roots to the depth of an inch or more, and give them a light dressing of wood ashes. This is the surest mode of obtaining fair and smooth Spring Turnips in old gardens, where they are almost certain to grow wormy if the earth is allowed to remain in contact with the roots. It is important to get them started very early, so that they may have time to grow of a sufficient size before very hot weather, when they will soon become tough and strong. For the Fall and main crop, sow from the middle of July to the last of August, in drills as directed for the Spring sowing. In the field, Turnips are more generally sown broadcast, though much larger crops are obtained by drill culture.

Sweet, Pot and Medicinal Herb Seeds.

Herbs are valuable for culinary and medicinal purposes, but they do not always receive the attention which they deserve. They are easily grown, and when preserved by drying are ready for use at any season of the year. Sow in Spring as soon as the weather is warm, and thin out as the plants grow up; or the seeds may be sown under glass and the young plants afterwards transplanted to their respective beds. The perennial kinds should occasionally be divided and transplanted in Spring.

## SWEET, POT AND MEDICINAL HERB SEEDS—Continued.

	Per oz.
<b>Anise</b> ( <i>Pimpinella anisum</i> ), an annual, cultivated for its seed and its leaves, which are used for garnishing and for seasoning . . . . .	\$0 10
<b>Balm</b> ( <i>Melissa officinalis</i> ), a hardy perennial, used for making balm tea and balm wine . . . . .	30
<b>Basil, Sweet</b> ( <i>Ocimum basilicum</i> ), This is a tender annual, cultivated for its leaves, which are much used for flavoring soups and sauces . . . . .	20
<b>enne</b> ( <i>Sesamum orientale</i> ) . . . . .	15
<b>Borage</b> ( <i>Borage officinalis</i> ), hardy annual, sometimes used as a pot-herb, and also for garnishing, but chiefly required for claret cup and other cooling drinks. Bees are very partial to the flowers . . . . .	15
<b>Caraway</b> ( <i>Carum carui</i> ), hardy biennial, cultivated for its seed, which is largely used in various kinds of confectionery and for giving flavor to liqueurs . . . . .	10
<b>Catnip</b> ( <i>Nepeta cataria</i> ), perennial . . . . .	40
<b>Coriander</b> ( <i>Coriandrum salivum</i> ), an annual, raised for its seeds, which are used by confectioners, and sometimes to disguise the taste of medicine . . . . .	10
<b>Dill</b> ( <i>Anethum graveolens</i> ), annual, the leaves are used in soups and sauces, and the seeds are sometimes added to pickled cucumbers to heighten the flavor. Medicinally they are good for flatulence and colic in infants . . . . .	10
<b>Fennel</b> ( <i>Anethum feniculum</i> ), hardy perennial, leaves used for garnishing, and in the preparation of various fish sauces . . . . .	10
<b>Horehound</b> ( <i>Marrubium vulgare</i> ), hardy perennial, principally used for medicinal purposes . . . . .	20
<b>Hyssop</b> ( <i>Hyssopus officinalis</i> ), hardy perennial; the leafy tops and flowers are used for making hyssop tea . . . . .	15
<b>Lavender</b> ( <i>Lavandula spica</i> ), a popular aromatic herb . . . . .	20
<b>Majoram, Sweet</b> ( <i>Origanum Marjorana</i> ), for seasoning . . . . .	20
<b>Opium Poppy</b> ( <i>Papaver somniferum</i> ) . . . . .	20
<b>Rosemary</b> ( <i>Rosmarinus officinalis</i> ), an aromatic herb . . . . .	30
<b>Rue</b> ( <i>Ruta graveolens</i> ), used for medicinal purposes, also frequently given to fowls for the croup . . . . .	15
<b>Saffron</b> ( <i>Carthamus tinctorius</i> ) . . . . .	10
<b>Sage</b> ( <i>Salvia officinalis</i> ), much used for flavoring various articles of cookery. It is also possessed of medicinal virtues. Tea made from its leaves is a sudorific, causing profuse perspiration . . . . .	15
<b>Summer Savory</b> ( <i>Satureia hortensis</i> ), annual. It has medicinal and culinary uses. Its aromatic leaves are much esteemed in salads and soups . . . . .	15
<b>Sorrel, Broad Leaved</b> , used in salads . . . . .	15
<b>Thyme, Broad Leaved English</b> , hardy perennial. Thyme is used in various ways, for soups, sauce and dressings, and a tea is made of the leaves which is a great remedy for nervous headache . . . . .	35
<b>Tarragon Roots</b> , each . . . . .	35
<b>Tansy</b> ( <i>Tanacetum vulgare</i> ) . . . . .	30
<b>Wormwood</b> ( <i>Artemisia absinthium</i> ), used for medicinal purposes; it is also beneficial to poultry, and should be planted in poultry grounds . . . . .	30

## GRASS SEEDS.

These Prices are Subject to Variation.

<b>Blue Grass Kentucky</b> , ( <i>Poa pratensis</i> ), extra clean; does well on light dry soils; recommended for permanent pasture; it requires two or three years to form a good sod, and does not arrive at its perfection as a pasture grass until it is much older; valuable in mixtures for lawn . . . . .	Per lb.	\$0 18
	Per bushel of 14 lbs.	1 75
<b>Creeping Bent Grass, Florin</b> ( <i>Agrostis stolonifera</i> ), used by many for lawns, also well adapted to moist places . . . . .	Per lb., 35c., per bushel of 15 lbs.	4 50
<b>Crested Dogtail</b> ( <i>Cynosurus cristatus</i> ), good for permanent pasture for sheep, is productive and early, suffers but little from dry weather, and is one of the best grasses for lawns. 25 lbs. to the acre. Per lb. . . . .		65
<b>Hard Fescue</b> ( <i>Festuca duriuscula</i> ), admirable pasture grass of fine quality, thrives well in dry situations. 30 lbs. to the acre; 12 lbs. to the bushel (By bushel, 20c.) . . . . .	Per lb.	25
<b>Meadow Fescue</b> ( <i>Festuca pratensis</i> ), this is excellent for hay when sown with other grasses, such as Orchard Grass and Timothy, and is also considered one of the best grasses for permanent pasture on a great variety of soils. 40 lbs. to the acre . . . . .	Per lb.	25
<b>Sheep's Fescue</b> ( <i>Festuca ovina</i> ), does well in high, dry and open pastures, is of short, dense growth, and valuable in lawn mixtures. 30 lbs. to the acre (By bushel, 20c.) . . . . .	Per lb.	25
<b>Meadow Foxtail</b> ( <i>Alopecurus pratensis</i> ), regarded as one of the most desirable grasses for permanent pasture, being early and rapid in growth. 25 lbs. to the acre (By bushel, 30c.) . . . . .	Per lb.	35
<b>Meadow Soft Grass</b> ( <i>Holcus lanatus</i> ), will grow with little or no care in any soil; it is chiefly cultivated where the better grass will grow. 3 bushels to the acre; 7 lbs. to bushel. Per bushel, \$1.40. Per lb. . . . .		25
<b>Orchard Grass</b> ( <i>Dactylis glomerata</i> ), is one of the most desirable of all pasture grasses, coming early in the Spring and remaining later in Autumn than any other. 3 bushels to the acre; 14 lbs. to the bushel . . . . .	Per bushel	2 50
<b>Red Top Grass</b> ( <i>Agrostis vulgaris</i> ), good permanent grass, excellent for lawns, pastures, etc., and sowing with Timothy and Red Clover for cutting for hay. Per bushel of 14 lbs., . . . . .		1 50
<b>Fancy Red Top Grass</b> , cleaned like Timothy; free from chaff . . . . .	Per lb.	18
<b>Rhode Island Bent Grass</b> ( <i>Agrostis canina</i> ), best of all grasses for lawns where only one variety is used . . . . .	Per bushel of 12 lbs.	3 50

## GRASS SEEDS—Continued.

<b>Rye Grass, English</b> ( <i>Lolium perenne</i> .) Probably one of the most important and valuable of the cultivated grasses; is naturally adapted to almost any soil; matures early, and is very productive, but contains less nutrition than Orchard Grass . . . . .		
	Per bushel of 24 lbs.	\$3 00
<b>Rye Grass, Italian</b> , ( <i>Lolium Italicum</i> .) This ripens much sooner than the English Rye Grass, and is greatly preferred by cattle, and greedily eaten by them, either in a green or dry state . . . .		
	Per lb.	12
	Per bushel of 18 lbs.	1 75
<b>Sweet Vernal Grass</b> ( <i>Anthoxanthum odoratum</i> .) is not valuable when sown alone, but when sown with other grasses it becomes so because of its early growth. It also yields a delightful odor when cured for hay. 10 lbs. to the acre, mixed with other grass . . . . .		
	Per lb.	90
<b>Tall Meadow Oat Grass</b> ( <i>Avena elatior</i> .) very valuable for pasture on account of its early and luxuriant growth. It shoots up very quickly after being cut, and produces a thick crop of aftermath, which also makes it valuable as a soiling crop. It has been lately in demand, and is much valued in the South. . . . .		
	25c. lb. Per bushel of 13 lbs.	2 25
<b>Timothy, Herd's Grass</b> ( <i>Phleum pratense</i> .) As a crop to cut for hay this is probably unsurpassed. It thrives best on moist, peaty or loamy soils, and is not suited to light or sandy soils, although on such it can, with care, be made to produce fair crops. Price according to market. 45 lbs. to bushel.		
<b>Rough Stalked Meadow Grass</b> ( <i>Poa trivialis</i> .) produces a constant supply of highly nutritious herbage, particularly on dry soils; one of the most valuable for laying down pastures and meadows on soils either moist or moderately dry. 14 lbs. to the bushel; 20 lbs. to the acre. Per lb. 50c. Per bushel		
		6 00
<b>Wood Meadow Grass</b> ( <i>Poa nemoralis</i> .) This grass grows well both on shady and exposed situations. 30 lbs. to the acre . . . . .		
	Per lb.	45
<b>Yellow Oat Grass</b> ( <i>Avena flavescens</i> .) good for dry pastures and meadows. Is much relished by sheep . . . . .		
	\$1 00 lb. Per bushel of 8 lbs.	6 50
<b>Golden or German Millet.</b> This variety is a heavier cropper than the Hungarian Grass, and needs a longer season and stiffer soil. Grows from three to five feet high, stands up well, is easily cured, gives general satisfaction. Three pecks to the acre . . . . .		
	Per bushel of 48 lbs., price variable.	
<b>Hungarian Grass</b> , a valuable forage plant, succeeds well on dry, light soil; withstands the drought remarkably, remaining green when all other vegetation is parched up, and if its development is arrested by dry weather the least rain will restore it to vigor. Sow broadcast. Three pecks to the acre . . . . .		
	Per bushel of 48 lbs., price variable.	
<b>Muzzy Bros.' Fine Mixed Lawn Grass</b> , composed of a mixture of the finest grasses; sow four to five bushels per acre . . . . .		
	15c. qt. Per bushel	3.00

## HOW TO MAKE A LAWN.

The ground ought to be carefully prepared during the Winter, by draining if found requisite, and digging to the depth of six to twelve inches, according to the nature of the soil. The land should then be leveled and raked to remove stones, etc., and then made firm with a heavy iron roller. When the natural soil is too stony, a supply of good mould should be spread over it to the depth of two or three inches. In March or April, before sowing the seed, the ground ought to be thoroughly cleaned and made perfectly level with the iron roller, and as the subsequent appearance of the lawn depends in a great measure on this part of the preparation, it is of the utmost importance it should be well done. The ground should then be evenly raked and the seeds sown. April and September are the best months for sowing. The seed should be sown on a calm day, at the rate of four bushels to the acre.

After the sowing has been accomplished, the ground should be again rolled, and as soon as the young plants have attained the height of two or three inches, the whole plot should be carefully gone over with a sharp scythe, and from the months of April to October it should be mown every ten days. Mowing machines are excellent after a comparatively close turf is established; but for the first six months' sowing, the scythe should be used in preference to the machine. *Frequent mowing and rolling are indispensable to maintain the turf in good order.* By adopting these means a close greensward will be obtained in a short time.

For lawns requiring improvement, and on croquet grounds, where the turf has become bare through constant use, it is only necessary to sow fresh seed at the rate of one or two bushels to the acre, either in the Spring or Fall, using a small tooth rake, and rolling afterwards. A slight dressing of manure, late in Fall, will often be found beneficial in encouraging the growth of finer kinds of grasses, and helps to produce a close growing turf.

# Muzzy Brothers' Celebrated Lawn Grass.

QUANTITIES TO BE USED.				
Plot 20 feet by 20 feet, sow 1 quart				Price \$0 15
" 25 " 50 " 4 "				" 50
" 25 " 100 " 8 "				" 75
" 1 acre, sow 3 bushels				Price, per bushel, 3 00

For large lawns, where turf has become bare through constant use, it is only necessary to sow fresh seed at the rate of one to two bushels to an acre. On such lawns it is well to use also our Lawn Dressing, which can be raked in.

Red Clover, Medium ( <i>Trifolium pratense</i> ). Price variable. 60 lbs. to bushel.		
Red Clover, Large, or Pea Vine. Price variable.		
White Clover ( <i>Trifolium repens</i> )	\$0 30	\$0 25
Alfalfa or Lucerne, requires a deep rich soil, and in such will produce several crops every season. Fifteen pounds to the acre	20	15
Alsike, or Swedish ( <i>Trifolium hybridum</i> ). Ten pounds to the acre	22	19
Crimson, or Italian ( <i>Trifolium incarnatum</i> ), sown in Autumn, it furnishes a very early fodder, and is excellent for soiling. Twenty pounds to the acre Price variable.		
Bokhara Clover ( <i>Melilotus alba</i> ), affords excellent feed for bees; it is a valuable soiling plant; lasts two years. Ten pounds to the acre	25	22
Yellow Trefoil ( <i>Medicago lupulina</i> ). Hop clover. Fifteen pounds to the acre	20	12

# Grains.

(Prices of Grains are subject to change with the market).

All grains are selected expressly for seed, and are strictly pure and true to name.

## SPRING WHEAT, 60 lb. Bushel.

	Per bush.
<b>Saskatchewan Fife</b> . . . . .	\$1 75
<b>China Spring</b> , chaff bearded variety, and a general favorite . . . . .	1 75
<b>Mediterranean Spring</b> . This variety has been grown with great success for a number of years in some sections of New England, and is very highly recommended. Is bearded, yields well, and the kernels are larger than those of other Spring varieties . . . . .	1 75
<b>White Russian</b> . This variety, recently introduced, has proved very valuable in many localities in the Northwestern States. Straw of good length, strong, does not lodge. It is not inclined to rust. Heads of large size and well filled with plump kernels weighing 60 to 62 lbs. to the bushel. Has produced 40 to 50 bushels to the acre . . . . .	2 00

## WINTER WHEAT, 60 lb. Bushel.

<b>Jones Winter Fife</b> , surpassing all other varieties in hardiness and productiveness . . . . .	1 75
<b>Golden Gross</b> , has the yield of the Clawson, with flour of the Mediterranean . . . . .	1 75
<b>Clawson</b> , also known as the Seneca. This is a beardless white wheat with red chaff. It proves early and hardy, has a stiff straw, yields larger crops than any other . . . . .	1 75
<b>Fultz</b> . A beardless amber variety, grown largely in some sections of Pennsylvania, and with very satisfactory results. It is very hardy and productive, and the straw is of medium length and very strong; makes excellent flour . . . . .	1 75
<b>Red Mediterranean (American)</b> . This is the imported variety fully acclimated and is a standard wheat. The heads are bearded and well filled. It succeeds well in nearly all localities and ripens early . . . . .	1 75

## OATS, 32 lb. Bushel.

<b>Swedish</b> , heavy and bright color . . . . .	} Prices on application.
<b>Washington</b> , very popular, and standing well until fully ripe . . . . .	
<b>Probsteier</b> , very productive and heavy. The straw is very strong. No. 32 . . . . .	
<b>Scotch</b> , one of the leading varieties . . . . .	
<b>Welcome</b> . . . . .	

## RYE, 56 lb. Bushel.

<b>Spring Rye</b> . . . . .	1 25
<b>Winter Rye</b> . . . . .	1 00

Dwarf Beans . . . . .	1 qt. to 100 ft. "	Tomato . . . . .	1 oz. to 2000 "

# Cultivation of Flower Seeds.

## HARDY ANNUALS.

No class of plants or flowers is so easy of cultivation as Hardy Annuals; their brilliant and varied colors and the readiness with which they adapt themselves to almost any soil or situation have rendered them general favorites.

Successive sowings may be made from March to the end of September; March, April and May are the best months for a general Summer display; June and July for Autumn blooming, and August and September for Spring flowering. The soil should be carefully prepared by being finely pulverized and made light and rich.

Sow thinly; cover with a very thin coat of fine, dry earth—the smallest seeds needing but a mere dusting to cover them—and from the first keep the plants thinned sufficiently to prevent overcrowding, which weakens them and produces poor blooms.

## HALF HARDY AND TENDER ANNUALS.

These include some of the most beautiful and varied of our Summer flowers, among which may be mentioned Aster, Balsam, Ten-Weeks' Stocks, Phlox Drummondii and Double Zinnia, which in form, size and brilliancy of flowers, and their great diversity of color, are now brought to a high state of perfection.

Sow from the beginning of March to June; when sown in March and early part of April, sow thinly in well-drained pots, pans or boxes; place in the greenhouse or a frame where there is a mild heat, or, in the absence of these, a sunny window in the house will do; cover the seeds lightly, press down the soil firmly and give a gentle watering with a fine rose water pot.

Separate the plants when large enough to handle, and finally plant out in May, as soon as the weather is sufficiently warm, where intended to flower. The seed can be sown in the open ground in May and June.

*Balsam.*

*Briza—Quaking Grass.*

*Carnation.*

## HARDY BIENNIALS AND PERENNIALS.

These can be grown at all seasons of the year in the open garden without protection, and may therefore be placed among the most useful of our flowering plants; their variety is almost endless, producing almost every form of flower and shade of color.

The seed may be sown from May to October, but the best time is in May and June. Select for sowing a shady, moist situation, and, in order to secure fine, strong plants, sow thinly, and as soon as large enough transplant in showery weather to nursery beds, and finally plant out in October and November; those sown in Autumn are best planted out in March or April, where intended to flower. Many Perennials, if sown early and treated as Annuals will flower the first season. The Pansy, Petunia, China Pink and its several splendid varieties, and many others, do better as Annuals than Perennials.

**Half Hardy Biennials and Perennials** may be raised and treated in the same way as recommended for Half Hardy Annuals.

## ANNUALS FOR WINTER BLOOMING.

Many Annuals are very desirable for the greenhouse for Winter blooming; these should be sown in July or August. The most important are Browallia, Candytuft, German Stocks, Lobelia, Mignonette, Schizanthus, Sweet Alyssum and Dwarf Nasturtiums. Many varieties as well as the above may be sown in the Fall and Winter for blooming early in the Spring, such as Acroclinium, Ageratum, Antirrhinum, Apple-scented Geranium, China Pinks, Dianthus, Mimulus, Myosotis, Pansy, Petunias, Phlox Drummondii, Salpiglossis, Salvia, Verbena, Vinca and others.

# General List of Flower Seeds.

## Abbreviations and Signs used in the following list:

- A. Annual, refers to those plants that last but one season, and must be raised annually.  
 B. Biennial, raised one year, bloom and die the next.  
 P. Perennial, lasts to or more seasons.  
 h. Hardy, as those that may be grown at all seasons in the open air, without protection.  
 hh. Half hardy, require the protection of a frame, pit, or handlight till May, when they may be transferred to the open garden.  
 t. Tender, require to be raised and grown under glass, and will only do in the open air in July, August and September.  
 cl. Climbing, as Cypress Vine, Morning Glory, etc.  
 spr. Spreading or trailing, as Verbena.  
 g. Greenhouse, those plants which require to be grown under glass.  
 s. Shrubs, plants of a shrubby or bushy habit.

Those Biennials, and Perennials marked with an asterisk (\*) will bloom the first year if sown early.

A General Fertilizer Suitable for Every Crop.

Stands ahead of anything in the market in Analysis, Selling Price and Results.  
The Great Satisfaction this Fertilizer has given our Customers, being so universal,  
enables us to recommend it as the Leading Artificial Manure in the Market.

“SWIFT-SURE” PHOSPHATE  
BEST FERTILIZER EVER MANUFACTURED.

GUARANTEED ANALYSIS.

Ammonia . . . . .	3 to 5 per cent.	Soluble and Precipitated Phosphoric Acid, 9 to 11 per cent.
Potash . . . . .	4 to 6 “	Insoluble Phosphoric Acid . . . . . 5 to 6 “
Per ton (10 bags), \$33.00 ; per bag (200 lbs), \$3.50.		

“SWIFT-SURE” SUPER-PHOSPHATE  
FOR POTATOES.

Nearly every farmer grows Potatoes, and consequently is, with the trucker and market gardener, interested in buying that fertilizer which, for the least cash outlay, will bring him the best returns ; as it is no longer a question, but an actual fact, that with a Potato Manure made from first-class material, like our “**SWIFT-SURE**” **SUPER-PHOSPHATE FOR POTATOES**, you can grow a larger crop of Potatoes than you can with barnyard manure, and have them smoother, freer from imperfections, and of more uniform size.

GUARANTEED ANALYSIS.

Ammonia . . . . .	3 to 4 per cent.
Soluble and Precipitated Phosphoric Acid . . . . .	9 to 12 “
Insoluble Phosphoric Acid . . . . .	5 to 6 “
Per ton (10 bags), \$33.00 ; per bag (200 lbs.), \$3.50.	

MUZZY BROS.’ GUANO  
FOR TOMATOES, TRUCK AND CORN.

GUARANTEED ANALYSIS.

Ammonia . . . . .	2 to 3 per cent.
Avail Phosphoric Acid . . . . .	8 to 9 “
Potash (actual) . . . . .	5 to 6 “

This Guano is also made from excellent materials, and while not so high a grade as our “Swift-Sure,” neither does it cost as much. **TRY IT!**  
Per ton (10 bags), \$28.00 ; per bag (200 lbs.), \$3.00.

MUZZY BROS’ SPECIAL FERTILIZER  
FOR GENERAL CROPS.

Analysis: **Ammonia**, 3 to 4 per cent. **Phosphoric Acid**, 10 to 12 per cent. **Potash**, 4 to 6 per cent.  
An excellent Fertilizer for General Crops. Per ton, \$31.00 ; per bag, \$3.25.

## LONG AND SHORT HANDLE SHOVELS AND SPADES.

### THE OLE OLSEN LAWN RAKE

(PATENT APPLIED FOR)

Is Made on Scientific Principles, combining Lightness,  
Neatness, Strength and Durability.

A LEADING SELLER FOR 1902.

The knob on end of teeth, set by our patent process, absolutely  
prevents the teeth from dropping out.

Note particularly curved head. Teeth are close set and clinched.

Price, 50c.

The **Curved Head** admits of only four to six teeth coming in contact with the surface of the lawn, the teeth on either side of the center performing their work perfectly, without touching or tearing up the lawn. This feature makes the Ole Olsen Rake unapproachable for light draught; also the head being curved, in raking throws the materials toward center of rake and makes it easy to handle. The Rakes are also furnished when desired with **Straight Heads**.

The **Teeth** are made of extra selected stock, and so constructed that when driven into the head they will **never shrink from place and cannot fall out**. They have an even taper, and in use acquire a high polish. They cannot bend, and therefore will not clog and bind like a metal tooth.

# The "Planet Jr." Garden Seed Drills

## "Planet Jr." No. 4.

HILL DROPPING SEED DRILL, HOE,  
CULTIVATOR, RAKE AND PLOW.

**Price, complete, - - - - \$9.50**  
**" as a drill only, - - - - 7.50**

We are pleased to offer for 1902 a new combined tool of great excellence, which we can scarcely recommend too highly. It combines conveniently in a single garden implement a capital hill dropping and a continuous row seeder with the most perfect and complete wheel hoe, cultivator, rake and plow that the most practical can desire. Designed by a practical man, it is light, compact, durable and easy running, and does all its great variety of work with a thoroughness and perfection that has never before been attempted, much less equaled.

## No. 7 "Planet Jr." All Steel Horse Hoe and Cultivator.

*This Horse Hoe* is the No. 8 without the depth regulator and with a slightly different lever wheel. It works the same as No. 8 in every way, except that it lacks the perfect steadiness and absolute control of depth made possible by the depth regulator.

**No. 7 Horse Hoe.**  
**Price, with attachments as in cut,**  
**\$7.00.**

**No. 8 "PLANET JR." same as**  
**No. 7, with addition of depth**  
**regulator. Price, \$7.50.**

## "Planet Jr." No. 5.

MARKET GARDENER'S HILL DROPPING  
SEED DRILL.

**Price, - - - \$12.50**

**A Good Drill** Is one of the most important of all the market gardener's tools, and is often invaluable to the farmer. It "pays at both ends;" it saves labor and seed in planting, work and worry in hoeing, and makes a larger and more even crop.

## No. 5

## "Planet Jr."

**All Steel Horse Hoe**  
**and Cultivator.**

Practically the same implement as No. 7, except wheel lever; it is our leader.

**Price, - - - \$5.50**

**T**HE "Planet Jr." Double-Wheel Hoe is a great favorite, especially for field work. **It hoes both sides of the row at once at the speed of a moderate walk.**

A wheel hoe should be double or **at least** capable of hoeing both sides of a row at one passage. Any inequalities can be accurately followed when straddling but one row, while between two the tool must work the narrowest points, and therefore be quite too narrow for the wider parts; nor can a person watch two rows and work them as closely as one, even if planted accurately.

PRICE, - - - \$6.00

## "Planet Jr." No 15.

Single-Wheel Hoe,  
Cultivator,  
Rake and Plow.

PRICE,

Complete . . . . .	\$6 00
Less Rakes and Leaf	
Guard . . . . .	4 75
Plain (with Hoes only)	3 25

**F**OR 1902 we offer an improved Single-Wheel Hoe which we will call No. 15. *It is the latest and best in every particular*, and we recommend it as very superior in many respects to any of the old styles. It has a great variety of tools, especially adapting the implement to a variety of crops, and work at different distances apart; and there is scarcely any garden culture it is capable of and which cannot be done with it more easily and better than with older patterns.

Fig. 10.—The "Planet Jr." Double-Wheel Hoe, Cultivator, Rake and Plow Combined.

## The "Planet Jr." Twelve-Tooth Harrow, Cultivator and Pulverizer.

Price, Plain, \$5.00; with Wheels, \$6.00; Complete, \$7.50.

This tool has grown remarkably in favor, owing to its neatness and perfect work.

**THE FARMER** uses it in deep or close cultivation of potatoes, corn, etc., when small, or when desiring to work the crop thoroughly without hilling.

**THE STRAWBERRY GROWER**, to keep the ground loose and to work up and bed the runners; the round-throated teeth lift them and turn them aside without injury; ready to root the mellow soil, which is thoroughly prepared by the numerous small teeth.

**THE BEAN RAISER** uses it while the crop is small with the greatest satisfaction and benefit, and all through the season it is invaluable.

**THE MARKET GARDEN-**

**ER** finds it the most useful one-horse tool he owns. It narrows in an instant or widens. Cuts deep or shallow, is thorough but gentle in its action, steady running, and is useful everywhere.

## Hitchcock Potato Digger and Shovel Plow Combined.

Patented Dec. 23, 1884.

## MOUNTED GRINDSTONE.

WE FURNISH THREE SIZES,  
No. 1, No. 2 & No. 3.

No. 1, \$5.00; No. 2, \$4.50; No. 3, \$4.00.

This implement, though very simple in appearance, is the result of much study and many experiments; and it is as near perfect as can be attained and come within the reach of every farmer. The sale of several thousand during the past few years proves it a success. By the changing of one bolt it may be converted either into a **SHOVEL PLOW** or **POTATO DIGGER**. The fingers are adjustable, being held in position by the plow point. Thus, in case of breakage, a new part may be inserted without the expense of a whole new head. The fingers, points and wings are made of steel, rendering it light, strong and durable.

**Price, Potato Digger, \$7.00; combined with Shovel Plow, \$9.00.**

# Dixie Cultivator and Horse Hoe Combined

Steel Frame, two Levers and Wheel, Double Standard . . . . .	\$5 50
Steel Frame, one Lever and Wheel, " " . . . . .	5 00

## *The New Two Horse McCormick Steel Mower.*

The McCormick No. 4 Steel Mower has won more rewards in competitive field trials than any other grass cutter on wheels, and we take this opportunity to call your attention to the flattering record our machines have made in these contests, and to the fact that experts and exhibition judges unite in pronouncing it the best mower ever manufactured.

**PRICE, 4 1-2 or 5 Ft. CUT, - - \$42.00.**

## **McCormick Harvester and Binder.**

**PRICE WITH CARRIER, - - - \$120.00.**

The wheels weigh thirty-eight pounds less than the cast-iron wheels used on other harvesters.

Cast-iron is cheap. Special forms of steel threaded, drilled, and put together as is our main wheel, costs money. The makers of the cast-iron wheels, however, have harvesting machines that weigh a few pounds, as does this new and improved Open Elevator. And as their wheels weigh more, their framing elevators or binder must weigh less. This means cheap construction to them, as they have saved in steel and malleable iron, but it is a dear construction to the buyer, as strength has been thrown away where needed and cast-iron put in to be drawn by tired horses. If McCormick machines were not better constructed than others we would not ask you to buy them.

## McCORMICK DAISY REAPER.

PRICE, - - - - \$65.00.

The original McCormick invention was a reaper, a machine for cutting grain and leaving it in loose bundles to be bound by hand. This was the function of that invention of 1831 which wrought so great a revolution in the agricultural world, and which has resulted in the addition of untold millions to the wealth of nations.

Points of Superiority  
Embodied in the

### ALL METAL "TIGER" SELF = DUMP RAKE.

1. Tubular thills or shafts gracefully curved to insure greatest comfort to horse. Adjustable for one or two horses. 2. Metal platform, firmly riveted together; no bolts to get loose or platform to rot, warp or become shaky. 3. Spring steel seat support, with extra large comfortable steel seat, making it a pleasure to ride. 4. Powerful steel angle cleaner bar, able to stand the severe strain to which it will be subjected. The rake will never sag, as the steel will be just as good and strong after five or ten years' service as when new. 5. Tempered oval steel cleaners fastened in cleaner bar with nut. They will not break or pull out. 6. Flanged steel tooth guide and angle steel head. No splitting or warping. 7. Solid lump wheel, with our old reliable lifting latch, which cannot be equaled for efficiency. 8. Steel wheel, with  $1\frac{3}{4}$  inch tire, 16 spokes. Our own make. 9. A divided lever, which obviates all danger to the operator. 10. A convenient hand-dumping lever to use when needed. 11. A lever connection with five changes for different heights of teeth to suit any kind of work. 12. The trip chain as convenient for children, so that any boy or girl, who can drive a horse, can use the Rake.

Made in three sizes, 8, 10 and 12 foot, and with teeth three or four inches apart.

PRICE, - - - \$20.00. GRANGER, NOT SELF-DUMP, WITH STEEL WHEEL, - \$17.00.

No. 16 TIGER HAY TEDDER, - \$30.00. Best Make in the Market.

## THE CHAMPION Vegetable Cutter.

- No. 1. Weight 120 lbs., for Hand Power. **Price, \$6.98**  
 No. 2. With pulleys, for Horse Power. **Price, \$12.00**

This machine is simple in construction, strong and durable, and prepares Pumpkins, Turnips, Beets, Carrots, etc., so as to be fed to stock without danger of choking them. The machine will cut by hand from one to two bushels per minute. The hooked teeth are upon rings that are easily put upon the shaft, and furnished, when required, at 30 cts. each.

## Grape and Apple Grinder.

This Grinder is well adapted to grind any Fruit, particularly Grapes, separating seeds from the pulp, and large enough to grind 4 to 6 bushels of Grapes in one hour. Has Steel Pins firmly fastened in Wood Roller, also on both sides of the box; no berries can escape.

Made in Oak Wood, Varnished, Galvanized Iron parts. Top of Box or Hopper is 16 in. x 9 ½ in. The cross arms are 25 in. long. Inside Roller 5 ½ in. x 7 ½ in. **Price, \$2.98.**

## Grape or Berry Mill.

This Mill is used for Crushing and Grinding of Grapes and Berries. Has two large Corrugated Rollers inside, and capable of grinding from 8 to 10 bushels of Grapes, Berries, etc., in one hour. Size of Corrugated Rollers, each 9 in. x 4 ½ in. Cross arms 29 in. long and 15 in. wide. In Oak Wood, Varnished.

The iron Wheel is 13 in. diameter and weighs 20 lbs., and iron cog wheels. Iron work is painted black. **Price, \$4.98.**

# F. W. Mann Co's Patent Bone Cutters

No. 5, B.

Are absolutely the first Bone Cutters ever sold to the public, and they are by far the most successful hand and power machine on the market to-day for cutting up green bones.

## Original Invention.

Nine years of practical use among poultrymen has only served to increase their popularity and prove their necessity.

## Old Methods a Failure.

Before the advent of the Mann Cutter, bones for poultry food were broken up with a hammer or reduced in mills constructed with chilled or cast-iron plates. This process, while possible with burned or thoroughly dried bones, was a total failure for bones as they come from the market.

## Corrugated Knives.

Our machine introduced for the first time corrugated knives of the finest tool steel, accurately tempered, which enable us to cut the hardest bone, either dry or fresh from the market, with ease and without injury to the knives. These knives retain a good cutting edge, without grinding, for two or three months of ordinary use. They are adjustable to cut finer or coarser, can be easily removed when dull, and can be sharpened on a common grindstone, the same as a carpenter's chisel.

## Combined Barrel, Truck and Hand Cart.

When we consider the almost innumerable uses to which our combined Truck and Hand Cart can be applied, its "handiness" and the immense amount of time and hard labor saved by its use, it is not a matter of surprise that it is steadily growing into popular favor. It is one of those articles that causes the user to wonder how he ever did without it, as it really becomes indispensable when once used.

The barrel is raised from the place desired, and **instantly detached**, all without **handling**. The weight being balanced over the axle, no lifting or down pressure is needed in transportation.

Other barrels for various purposes can be used as needed, extra trunnions being furnished, if desired, which can be readily attached to any oil or spirit barrel, thus increasing indefinitely the value of the Truck.

We have wheels of 1½, 2½ and 4 inches tread, **but always send Trucks with Wheels, 1½ inches, unless otherwise specified.**

We also supply a box without trunnions and spring catch, making a very superior **dumping** Hand Cart.

No Castings to break; all irons of best wrought.

Very stiff, handsome, compact, low in price.

Furnished with or without Barrel or Box, as ordered.

BARREL, TRUCK, HAND  
CART, SPRINKLER  
AND BARREL FORCE PUMP.

FIG. 48.

## Showing Sprinkler Attachment.

PRICE - - \$3.25.

AS shown by the cuts on this page, we have recently largely increased the usefulness of our Barrel Truck by the addition of a first-class Sprinkler and Force Pump, both being sold as attachments and easily applied to barrel.

## The Eclipse Atomizer.

THE BIGGEST LITTLE BUG KILLER ON EARTH.

THE Eclipse form of tank is shown in cut, and experience shows that it is the best form. Many forms have been attempted that show in practice fatal objections; a notable one being the conical one with point downward, which is easily understood by the explanation that paris green and other poisons are insoluble and only held in suspension in the water and settle very rapidly; the method of agitation in atomizers being to shake frequently. Now, when allowed to settle, even for a minute, in a conical can, it concentrates very rapidly and is very soon strong enough to kill any foliage, so with the least neglect it becomes a plant-killer instead of a plant-saver. Our experience leads us to adopt the moderately broad bottom can shown, as the safest and easiest to keep thoroughly mixed of any form.

# The "BALDWIN" Fodder and Ensilage Cutters.

FOURTEEN SIZES FOR HAND AND POWER.

EACH SIZE CUTS FOUR DIFFERENT LENGTHS.

## The Baldwin Hand Fodder Cutter.

American Standard,  
No. 4.

			1 knife. 2 knives.
No. 1.	For hand use; is the smallest size we make. Length of knife, 6 inches; length of cut, $\frac{1}{2}$ , 1, $1\frac{1}{2}$ and 2 inches.....	\$11 70	
No. 9.	Machine has $8\frac{1}{4}$ -inch knife, and is our second size Hand Cutter. Lengths of cut with one knife, $\frac{1}{2}$ , 1, $1\frac{1}{2}$ and 2 inches; with two knives, $\frac{1}{4}$ , $\frac{1}{2}$ and $\frac{3}{4}$ inch .....	14 30	\$16 25
No. 10.	Has $9\frac{1}{2}$ -inch knife. This size will be found one of the best for persons wishing to cut by hand for from five to eight head. We manufacture them with one and two knives. Length of cut with one knife, $\frac{1}{2}$ , 1, $1\frac{1}{2}$ and 2 inches; with two knives, $\frac{1}{4}$ , $\frac{1}{2}$ , $\frac{3}{4}$ and 1 inch .....	16 90	18 52
No. 11.	This size has 11-inch knife, and will be found the best for livery stables and farmers wishing to cut by hand for a large stock, say from fifteen to twenty-five head. We manufacture them with one and two knives. Length of cut, with one knife, $\frac{1}{2}$ , 1, $1\frac{1}{2}$ and 2 inches; with two knives, $\frac{1}{4}$ , $\frac{1}{2}$ , $\frac{3}{4}$ and 1 inch. ....	19 50	20 80
No. 12.	is our largest size Hand Cutter. It is a large, powerful Cutter, having a 13-inch knife. It is built very heavy and strong, and will be found just the thing for anyone wishing to cut by hand for a large stock. Length of cut, $\frac{1}{2}$ , $1\frac{1}{2}$ and 2 inches.....	24 70	
No. 13A.	Power Wheel .....		29 25
No. 13 $\frac{1}{2}$ .	Power Wheel .....		32 50

## The American Standard Hand Corn Planter.

THE UNIVERSAL FAVORITE.

The only Planter containing an adjustable dropping disk.  
The disk is quickly adjusted for a light or heavy seeding, and rotates similar to the disk in a Horse Planter.  
The Planter is easily operated by a BOY or GIRL  
Works in all kinds and conditions of soil, and is the only one which insures an accurate and reliable seeding.  
Try one; it speaks for itself.  
No. 4. A medium to heavy dropper. For a general purpose Field Corn Planter it has no equal. It is the favorite of this series, and its sales exceed those of all other planters ever manufactured combined. Price, \$1 50.

# Darnell's Patent Furrower and Marker

(IMPROVED).

In presenting the numerous merits of this invaluable little implement we would be glad to draw a comparison with another of its kind, but we have seen or heard of nothing but the ordinary scratch sleds which make a mere mark as a guide for the plow which follows, thus increasing the work instead of lessening it.

We have a genial ever-borrowing neighbor, however, with whom we might compare notes, and we will just bring him forward with his plow which he is inclined to think is good enough yet. We think you will not fail to notice the difference.

We ride while he walks.

We bring into requisition the services of our boy, if busy ourselves, while nothing short of a man, and a good one, too, can handle the plow.

We open two furrows, while he opens one in clean ground, and do it better.

Price, With Large Disks, \$17.50.

# BRYAN GRANT FAN MILLS.

No. 1, with 5 sieves, 14x18 inches	\$13 00
" 2, " 5 " 16x18 "	15 00
" 3, " 5 " 16x20 "	18 00
" 4, " 5 " 18x20 "	20 00
" 5, " 5 " 20x20 "	22 00
" 6, " 5 " 22x20 "	25 00

The Mills, from their long known reputation, do not need any recommendation. They clean all kinds of grain well ; if wheat has foul stuff in it, it needs to be run through twice to make it clean.

FIG. 062.

# FIELD ROLLER.

The above cut represents the most improved Roller, constructed wholly of iron, except the tongue and box, which are of wood. The rollers are made of various diameters and in sections on a wrought-iron shaft.

# The New Model Seed Drill.

The Most Perfect Drill in America.

PRICE, - - \$6.50

The record of the "New Model" has been so entirely satisfactory, and its place as one of the leading drills has become so firmly established, that we are almost tempted to discard the word "New." It is surprising to see how quickly it has been adopted by the seedsmen and market gardeners as an old friend.

## "XXth-Century" Freezer.

PATENT ALLOWED.

ICE CREAM WITHOUT LABOR.

THE LOWEST PRICED  
ICE CREAM FREEZER  
ON THE MARKET.

Owing to the absolute simplicity of construction it may be thoroughly cleansed in a few moments.

### PRICE LIST.

- No. 2 Will freeze as much cream as 2 Quart Dash Freezer, \$1.50
- No. 3 Will freeze as much cream as 3 Quart Dash Freezer, \$1.75
- No. 4 Will freeze as much cream as 4 Quart Dash Freezer, \$2.00

## Improved White Mountain Freezer.

This is universally the favorite family Ice Cream Freezer, because it combines more excellences than all the other family Freezers made. It will, in four minutes, freeze to uniform hardness cream of even grain and perfect smoothness.

This is a strong, well-made and neatly finished Settee. The timber used in its construction is of the best quality, straight-grained, and tough. Ash is the wood used unless otherwise ordered.

Also Wood, Galvanized Iron and Wire Settees for Cemetery or Lawn.

# Morgan Spading Harrow.

With Clearer Attachments.

This Spading Harrow does its work just as the hand spade does — by cutting into and lifting the soil, thereby disintegrating and aerating it, giving the same fine culture to broad fields that the gardener does to his narrow

garden; and special investigation and extended inquiry have only confirmed our opinion that it is the coming implement for pulverizing the soil, and that as now perfected it is unquestionably the best and cheapest harrow ever invented.

# Steel Ash Barrel Truck.

PRICE, \$2.75

Fig. 010.

## THE GEDDES HINGE HARROW. STEEL TEETH.

No. of Teeth.	Size of Teeth.	Price.	No. of Teeth.	Size of Teeth.	Price.
14	$\frac{3}{4}$ inch.	\$6 25	24	$\frac{7}{8}$ inch.	\$10 00
16	$\frac{3}{4}$ "	6 75	26	$\frac{7}{8}$ "	11 00
18	$\frac{3}{4}$ "	7 50	28	$\frac{7}{8}$ "	12 00
20	$\frac{7}{8}$ "	8 50	28	1 "	13 00
22	$\frac{7}{8}$ "	9 50	30	1 "	14 00

This Harrow is probably the best in use; being hinged, it works as well on uneven ground, and is easily raised to discharge weeds, etc. The teeth are all fastened with nuts and washers, preventing them getting loose. These Harrows are also made with curved teeth, when so ordered, at an additional cost of 3c. per tooth.

## The Improved... ...Hinge Harrow

No. of Teeth.	Size of Teeth.	Price.
24	$\frac{3}{4}$ inch.	\$9 50
30	$\frac{3}{4}$ "	12 00

The teeth, standing one foot apart each way, are not liable to clog, and yet their arrangement is such as to work the ground perfectly. It is a very strong Harrow, and may be drawn either end forward.

## Square Harrow

### STEEL TEETH.

No.	No. of Teeth.	Size of Teeth.	Price.
1 . .	15	$\frac{3}{4}$ inch,	\$4 50
2 . .	19	$\frac{3}{4}$ "	5 25
3 . .	23	$\frac{7}{8}$ "	6 00

This is the standard form of Harrow, suited to all kinds of work, and the cheapest.

# STEEL TOOTH HARROW.

The best smoothing and scratch Harrow now in use. Teeth can be adjusted to any angle by the levers. Frame is made of steel. 60 teeth.

**PRICE, - - - - - \$12.00**

## The Myers Combination Carrier.

Reversible and Swivel for Patent Double Steel Track.

Has  $\frac{7}{8}$ -inch Steel Axles and Oil Openings.  
Fig. 390. (Grab.)

This illustration shows our Myers Combination Steel Track Carrier. This Carrier is a Straight reversible, having all the valuable features and advantages of our Myers Double Lock. It has the same reliable trips and stops, and when used as a reversible carrier, operates the same way and is reversed the same way. The new feature in this Carrier is that the two rope pulleys are hung on a turn-table, which adds to this Carrier all the advantages found in a swivel carrier, in addition to those of any reversible carrier in the market.

Price, - - - - - \$4.00

## Double Steel Track, Put Together Before Shipping.

Fig. 644. (Ratan.)  
MYERS PATENT STEEL TRACK BUNDLED

When so required by dealers, we put track together as shown above before shipping. The advantage of this plan is that in erecting, the only thing necessary is to attach the splice clamps. Instead of old method of breaking joints in center of rail, we use a long heavy clamp, as shown in Fig. 641. This plan is recommended, as it adds all the advantages of the single rail, and makes the double rail the most desirable track for dealers to handle. PRICE, 10 CTS. PER FOOT.

See Complete Catalogue No. 30, Describing Full Line.

## Myers Combination Reversible Carrier.

With Swivel Attachments.

This illustration shows our Myers Combination Carrier. This Carrier is a Straight Reversible, having all the valuable features and advantages of our Myers Double lock. It has the same reliable trips and stops, and in addition is made to reverse by means of swivel as well.

Price, - - - - - \$4.00

Steel Track Hanging Hook. Fig. 302. (Joy.)

The "BOSS" Solid  
Steel Drag Scraper.

Pat. Nov. 4, 1897, and March 24, 1885.  
Best and Cheapest Scraper in the Market.  
No. 1. Capacity 7 cubic feet.....\$5 50  
No. 9. " 5 " " " " " " 5 00

These Scrapers are made from heavy plates of especially hardened steel, and are stamped from one sheet without joint, seam or rivet. They are superior to any other Drag Scraper upon the market, the "Columbus" Solid Steel Scraper alone excepted. The bowl being made of thicker and harder steel, enables it to scour where no other Scraper will; and owing to the sharp, rounded nose, it will enter the ground more rapidly than any other make of Scraper. The BALLS are STEEL, with perfect working swivels, and handles of hard wood. We will guarantee this Scraper in every particular. Made in three sizes.

Dairy Pans in Tin and Granite, all sizes.

Extra Heavy Boxes, for Milk Bottles, with Hinged Lid, removable inside partitions, to facilitate cleaning, will hold 12 quarts or 24 pints. Bottle Brushes.

Dash Churns, all sizes, prices from \$1.49.

# THE BLANCHARD CHURN.

The body of the Churn being cylindrical, all the cream is churned alike and at the same time, making streaked butter impossible. Those who desire to make butter on what is called the "granular system" can do it perfectly with the Blanchard Churn. If we were disposed to follow the example of some of our competitors, we could add page after page of "unsolicited" testimonials as to the accuracy of these claims; but we simply point to our past record and to the absolute guarantee under which all our sales are made.

## THE FAIRFIELD LAWN SWING.

Easily leads all others in the market for the following reasons:

FIRST: Because it is built upon the best mechanical

principles—and this combines the maximum of strength with the minimum of weight, and weds safety to durability.

Its notable lightness makes it easy to handle, while a scientific construction renders it remarkably easy to operate, and secures to it a peculiarly attractive and pleasing appearance.

'Tis "Fair" to claim that nothing now in the "field" equals the

# Palmer's Patent Hammocks.

THE superiority of this invention, comprising all the requisites of a perfect Hammock, will be apparent upon investigation. The theory upon which they are made gives greater strength and durability than can be obtained with the same amount of material by any other method. The novelty and comfort of the Pillow and Spreader cannot but be appreciated. They are highly ornamental, and as well adapted to indoor as outdoor use. All Hammocks are tested with weight of two persons.

## TWIN COMET LAWN SPRINKLER.

Covers Greater Area Than Any Other Sprinkler Made. Height, 17 inches; Weight, 6 pounds.

...Price, \$5.00...

Will sprinkle an area four times greater than any other Sprinkler made.

## THE "WATER WITCH" LAWN SPRINKLER.

PATENTED NOVEMBER 5, 1889.

In constructing this device the main object was to produce a sprinkler that would scatter the water **more evenly** and over a **larger area** than would any other sprinkler. This purpose has been fully realized in the "**Water Witch**."

The water flows through the nozzle with **unimpeded** force, and is divided and deflected by the two lips of the swivel piece, which it causes to revolve rapidly, scattering the water in **fine drops** and **evenly** over a circular area of **twenty-five to forty** feet diameter.

# Weatherproof "AQUARINE"

(Trade Mark Registered,)

## COLD WATER PAINT.

All the United States Buildings at the Paris Exposition for 1900 were painted inside and out with "AQUARINE."

Medal awarded at Paris Exposition.  
Highest award for Cold Water Paint.

Highest award at Buffalo.  
Two Medals.

### A Weatherproof Paint.

### A Fireproof Paint.

### A Good Disinfectant.

Furnished in powder form, in white and many colors.

Is not affected by weather nor by gases.

Mixes readily with **cold water**.

Only **one coat** is necessary.

One coat covers better than **two coats** of oil paint at one-half the cost.

A saving not only in material, but labor as well.

Does not require skilled workmen.

Any one can apply it with good results.

Will not rub, crack or scale off.

Produces a hard, brilliant finish.

Put up for household use in 5-lb. packages, **45 and 50c.**

### PRICE LIST.
